

Science of Synthesis Knowledge Updates 2022/1

	Preface	V
	Abstracts	VII
	Table of Contents	XV
15.9.4	Synthesis and Applications of Acridinium Salts (Update 2022) V. Hutskalova ^(a) and C. Sparr ^(a)	1
17.8.5	Porphyrins (Update 2022) N. Jux ^(a) , F.-P. Montforts ^(a) , and E. Haake ^(a)	45
17.8.6	Chlorins (Dihydroporphyrins) (Update 2022) N. Jux ^(a) , F.-P. Montforts ^(a) , and E. Haake ^(a)	79
17.8.7	Bacteriochlorins and Isobacteriochlorins (Tetrahydroporphyrins), and Hexahydroporphyrins (Update 2022) N. Jux ^(a) , F.-P. Montforts ^(a) , and E. Haake ^(a)	111
17.8.8	Contracted, Isomeric, and Expanded Porphyrins and Carba and Hetero Analogues (Update 2022) N. Jux ^(a) , F.-P. Montforts ^(a) , and E. Haake ^(a)	143
26.1.2.5	Synthesis of Ketones by Oxidation of Alkanes (Update 2022) V. C. S. Santana ^(a) , L. S. MunarettO ^(a) , and E. C. de Lucca, Jr. ^(a)	157
38.12	Product Class 12: Cyclic Diacyl Peroxides Y. A. Barsegyan ^(a) , V. A. Vil' ^(a) , N. C. O. Tomkinson ^(a) , and A. O. Terent'ev ^(a)	221
42.12.8	Alkylphosphonium Salts (Update 2022) T. Ayad ^(a) , J.-L. Pirat ^(a) , and D. Virieux ^(a)	271
42.18.2	Pentacoordinated Phosphoranes (Update 2022) R. Pajkert ^(a) and G.-V. Röscenthaler ^(a)	365
42.19.3	Hexacoordinated Phosphates (Update 2022) R. Pajkert ^(a) and G.-V. Röscenthaler ^(a)	395
44.2.6.11	Applications of Allenes in Organic Synthesis (Update 2022) M. A. Tius ^(a)	413
	Author Index	495
	Abbreviations	517

Table of Contents

Volume 15: Six-Membered Hetarenes with One Nitrogen or Phosphorus Atom

15.9	Product Class 9: Acridines	
15.9.4	Synthesis and Applications of Acridinium Salts V. Hutskalova ¹ and C. Sparr ²	2022
15.9.4	Synthesis and Applications of Acridinium Salts	1
15.9.4.1	Synthesis of Acridinium Salts	1
15.9.4.1.1	(5 + 1)-Strategy for Synthesizing Acridinium Salts	2
15.9.4.1.2	(2 + 1 + 2 + 1)-Strategy for Synthesizing Acridinium Salts	7
15.9.4.1.3	(3 + 2 + 1)-Strategy for Synthesizing Acridinium Salts	9
15.9.4.1.4	Synthesis of Acridinium Salts via Oxidation	10
15.9.4.1.5	Synthesis of Acridinium Salts via Derivatization at the C9-Position	12
15.9.4.1.6	Synthesis of Acridinium Salts via Acridine Alkylation	14
15.9.4.2	Applications of Acridinium Salts in Supramolecular Chemistry	15
15.9.4.3	Acridinium Salts as Chemosensors	18
15.9.4.4	Applications of Acridinium Salts in Photoredox Catalysis	19
15.9.4.4.1	Reactions Involving Alkene Activation and Alkene Functionalization	19
15.9.4.4.1.1	Introduction of a Trifluoromethyl Group to Alkenes via Acridinium Salt Catalyzed Reaction	25
15.9.4.4.2	Direct C—H Functionalization of Amines	27
15.9.4.4.3	Photoinduced Decarboxylation	29
15.9.4.4.4	Arene Functionalization	32
15.9.4.4.5	Fluoroalkylselenolation of Alkylsilanes and Alkyltrifluoroborates	38
15.9.4.4.6	C—C Bond Cleavage	40
15.9.4.4.7	Photocatalytic Reductive Dehalogenation of Aryl Halides	42

Volume 17: Six-Membered Hetarenes with Two Unlike or More Than Two Heteroatoms and Larger Hetero-Rings

17.8	Product Class 8: Porphyrins and Related Compounds	
17.8.5	Porphyrins 2022 N. Jux, F.-P. Montforts, and E. Haake	
17.8.5	Porphyrins	45
17.8.5.1	Porphyrins	49
17.8.5.1.1	General Concepts for Porphyrin Synthesis	49
17.8.5.1.2	Synthesis of Porphyrins	51
17.8.5.1.2.1	Method 1: Synthesis from Monopyrroles by Tetrameroidization	51
17.8.5.1.2.2	Method 2: Synthesis from Dipyrromethanes/enes by Dimeroidization ..	54
17.8.5.1.2.3	Method 3: Synthesis from Tripyrranes	56
17.8.5.1.2.4	Method 4: Synthesis from Tetrapyrroles by Ring-Closure Reactions	57
17.8.5.1.2.5	Method 5: Synthesis from Other Porphyrins	59
17.8.5.1.3	Transformations of Porphyrins	62
17.8.5.1.3.1	Method 1: Reduction of Porphyrins	62
17.8.5.1.3.2	Method 2: Oxidation of Porphyrins	62
17.8.5.1.3.3	Method 3: Electrophilic Substitution	64
17.8.5.1.3.4	Method 4: Cross-Coupling Reactions	70
17.8.5.1.3.5	Method 5: Miscellaneous Reactions of Porphyrins	74
17.8.6	Chlorins (Dihydroporphyrins) 2022 N. Jux, F.-P. Montforts, and E. Haake	
17.8.6	Chlorins (Dihydroporphyrins)	79
17.8.6.1	Synthesis of Chlorins	80
17.8.6.1.1	Method 1: Synthesis by Ring-Closure Reactions	80
17.8.6.1.2	Method 2: Synthesis from Porphyrins	93
17.8.6.1.2.1	Variation 1: Reduction of Porphyrins	93
17.8.6.1.2.2	Variation 2: Oxidation of Porphyrins	94
17.8.6.1.2.3	Variation 3: Cycloaddition Reactions	95
17.8.6.1.2.4	Variation 4: Sigmatropic Rearrangements and Miscellaneous Reactions ..	99
17.8.6.2	Transformations of Chlorins	101
17.8.6.2.1	Method 1: Reduction and Oxidation of Chlorins	101
17.8.6.2.2	Method 2: Electrophilic Substitution	103
17.8.6.2.3	Method 3: Cross-Coupling Reactions	104

17.8.7	Bacteriochlorins and Isobacteriochlorins (Tetrahydroporphyrins), and Hexahydroporphyrins N. Jux, F.-P. Montforts, and E. Haake	2022
17.8.7	Bacteriochlorins and Isobacteriochlorins (Tetrahydroporphyrins), and Hexahydroporphyrins	111
17.8.7.1	Synthesis of Bacteriochlorins	114
17.8.7.1.1	Method 1: Synthesis by Ring-Closure Reactions	114
17.8.7.1.2	Method 2: Synthesis from Porphyrins and Chlorins	119
17.8.7.2	Transformations of Bacteriochlorins	122
17.8.7.3	Synthesis of Isobacteriochlorins	125
17.8.7.3.1	Method 1: Synthesis by Ring-Closure Reactions	125
17.8.7.3.2	Method 2: Synthesis from Porphyrins, Chlorins, and Higher Reduced Porphyrinoids	127
17.8.7.3.2.1	Variation 1: Synthesis by Reduction	127
17.8.7.3.2.2	Variation 2: Synthesis by Oxidation	128
17.8.7.3.2.3	Variation 3: Miscellaneous Reactions	130
17.8.7.4	Transformations of Isobacteriochlorins	133
17.8.7.5	Hexahydroporphyrins	136
17.8.8	Contracted, Isomeric, and Expanded Porphyrins and Carba and Hetero Analogues N. Jux, F.-P. Montforts, and E. Haake	2022
17.8.8	Contracted, Isomeric, and Expanded Porphyrins and Carba and Hetero Analogues	143
17.8.8.1	Isomeric Porphyrins	145
17.8.8.2	Contracted Porphyrins	146
17.8.8.3	Carbaporphyrins	148
17.8.8.4	Heteroporphyrins	148
17.8.8.5	Expanded Porphyrins	150

Volume 26: Ketones

26.1	Product Class 1: Aliphatic and Alicyclic Ketones (Excluding Cyclobutanones and Cyclopropanones)	
26.1.2.5	Synthesis of Ketones by Oxidation of Alkanes V. C. S. Santana, L. S. Munaretto, and E. C. de Lucca, Jr.	2022
26.1.2.5	Synthesis of Ketones by Oxidation of Alkanes	157
26.1.2.5.1	Oxidation of Alkanes Using Iron Catalysts	157
26.1.2.5.1.1	Method 1: Using 1,1'-Bis(pyridin-2-ylmethyl)-2,2'-bipyrrrolidine Iron Catalysts	158

26.1.2.5.1.1.1	Variation 1:	Oxidation of Nitrogen-Containing Substrates	161
26.1.2.5.1.1.2	Variation 2:	Oxidation of Amide-Containing Substrates	163
26.1.2.5.1.2	Method 2:	Using Iron Complexes of <i>N</i> ¹ , <i>N</i> ² -Dimethyl- <i>N</i> ¹ , <i>N</i> ² -bis(pyridin-2-ylmethyl)cyclohexane-1,2-diamine and Other 1,1'-Bis(pyridin-2-ylmethyl)-2,2'-bipyrrolidine and 1,4-Dimethyl-7-[(6-methylpyridin-2-yl)methyl]-1,4,7-triazonane Ligands	165
26.1.2.5.1.3	Method 3:	Using Other 1,1'-Bis(pyridin-2-ylmethyl)-2,2'-bipyrrolidine Iron Complexes in the Oxidation of Cyclohexane	169
26.1.2.5.1.4	Method 4:	Using an Isomeric Mixture of 1,1'-Bis(pyridin-2-ylmethyl)-2,2'-bipyrrolidine Iron Complexes	170
26.1.2.5.1.5	Method 5:	Using an Iron/Thymine-1-acetic Acid Catalytic System	173
26.1.2.5.1.6	Method 6:	Using <i>N</i> ¹ , <i>N</i> ² -Bis(pyridin-2-ylmethyl)ethylene-1,2-diamine Iron Catalysts	175
26.1.2.5.1.7	Method 7:	Using Iron Oligopyridine Complexes	177
26.1.2.5.1.8	Method 8:	Using Polyoxometalates	178
26.1.2.5.1.9	Method 9:	Using a 1,1'-Bis(pyridin-2-ylmethyl)-2,2'-bipyrrolidine Iron Tweezer Complex	180
26.1.2.5.2		Oxidation of Alkanes Using Manganese Catalysts	183
26.1.2.5.2.1	Method 1:	Using a 1,1'-Bis(pyridin-2-ylmethyl)-2,2'-bipyrrolidine Crown Manganese Catalyst	183
26.1.2.5.2.2	Method 2:	Using a Substituted 1,1'-Bis(pyridin-2-ylmethyl)-2,2'-bipyrrolidine Manganese Complex	189
26.1.2.5.2.3	Method 3:	Using a Chiral Manganese Complex	190
26.1.2.5.2.4	Method 4:	Using a Manganese Complex Bearing Benzimidazole and Pyridine Rings	193
26.1.2.5.2.5	Method 5:	Using a Bulky and Electrophilic Manganese Complex	194
26.1.2.5.3		Oxidation of Alkanes Using Cobalt Catalysts	198
26.1.2.5.3.1	Method 1:	Using Cobalt Aminodiphosphine Complexes	198
26.1.2.5.3.2	Method 2:	Directed Oxidation Mediated by Cobalt	199
26.1.2.5.4		Oxidation of Alkanes Using Iridium Catalysts	200
26.1.2.5.4.1	Method 1:	Using (Pentamethylcyclopentadienyl)iridium Complexes	200
26.1.2.5.5		Metal-Free Oxidation of Alkanes	202
26.1.2.5.5.1	Method 1:	Oxidation Using Methyl(trifluoromethyl)dioxirane	202
26.1.2.5.5.1.1	Variation 1:	Methyl(trifluoromethyl)dioxirane Oxidation of the Position α to a Cyclopropyl Ring	203
26.1.2.5.5.2	Method 2:	Oxidation Using Hypervalent Iodine Reagents	204
26.1.2.5.5.2.1	Variation 1:	Remote Oxidation Using (Diacetoxyiodo)benzene	204
26.1.2.5.5.2.2	Variation 2:	Remote Oxidation Using [(Diphenylphosphoryloxy)(trifluoromethanesulfonyloxy)iodo]benzene	206
26.1.2.5.5.3	Method 3:	Oxidation Using Sodium Persulfate	207
26.1.2.5.6		Remote Oxidation Using Electrochemistry	208
26.1.2.5.6.1	Method 1:	Using Quinuclidine as Redox Mediator	208

26.1.2.5.7	Oxidation of Alkanes by Photocatalysis	210
26.1.2.5.7.1	Method 1: Oxidation Using Decatungstate	210
26.1.2.5.7.2	Method 2: Using a 4,4'-Dicarboxyl-2,2'-bipyridyl Iron Complex and Visible Light	214
26.1.2.5.8	Oxidation of Alkanes by Heterogeneous Catalysis	217
26.1.2.5.8.1	Method 1: Oxidation Using Gold and Palladium Nanoparticles Dispersed on a Zeolite-Type Metal–Organic Framework	217

Volume 38: Peroxides

38.12	Product Class 12: Cyclic Diacyl Peroxides	New
	Y. A. Barsegyan, V. A. Vil', N. C. O. Tomkinson, and A. O. Terent'ev	
38.12	Product Class 12: Cyclic Diacyl Peroxides	221
38.12.1	Synthesis of Cyclic Diacyl Peroxides	222
38.12.1.1	Synthesis of Phthaloyl Peroxides	222
38.12.1.2	Synthesis of Malonoyl Peroxides	223
38.12.1.2.1	Method 1: Synthesis from Substituted Malonic Acids	223
38.12.1.2.2	Method 2: Synthesis from 2,2-Bis(trifluoromethyl)malonyl Difluoride	225
38.12.1.2.3	Method 3: Synthesis from Substituted Diethyl Malonate	225
38.12.1.3	Synthesis of Diphenoyl Peroxide	226
38.12.2	Applications of Cyclic Diacyl Peroxides in Organic Synthesis	227
38.12.2.1	Reactions with Alkenes	227
38.12.2.1.1	Method 1: Oxidation of Alkenes To Give <i>syn</i> -Diols	227
38.12.2.1.1.1	Variation 1: Using 4,5-Dichlorophthaloyl Peroxide	227
38.12.2.1.1.2	Variation 2: Using 5,6-Dioxaspiro[2.4]heptane-4,7-dione	228
38.12.2.1.1.3	Variation 3: Using 5,6-Dioxaspiro[2.4]heptane-4,7-dione and Fluorinated Alcohols	229
38.12.2.1.1.4	Variation 4: Using 6,7-Dioxaspiro[3.4]octane-5,8-dione	230
38.12.2.1.2	Method 2: Oxidation of Alkenes To Give <i>anti</i> -Diols	231
38.12.2.1.3	Method 3: Oxidation of β,γ -Unsaturated Carboxylic Acids and Homoallylic Alcohols with the Formation of γ -Lactones and Tetrahydrofurans	233
38.12.2.1.4	Method 4: Oxidation of 2-Vinylbenzoic Acids with the Formation of Isobenzofuranones	234
38.12.2.1.5	Method 5: Oxidation of Homoallylic <i>N</i> -Tosylamines with the Formation of Pyrrolidines and Isoxazolidines	235
38.12.2.1.6	Method 6: Three-Component Reaction of 5,6-Dioxaspiro[2.4]heptane-4,7-dione, Alkenes, and Alkyl Tosylcarbamates	237

38.12.2.1.6.1	Variation 1:	<i>anti</i> -Oxyamination of Alkenes with 5,6-Dioxaspiro[2.4]heptane-4,7-dione and <i>tert</i> -Butyl Tosylcarbamate	237
38.12.2.1.6.2	Variation 2:	<i>syn</i> -Oxyamination of Alkenes with 5,6-Dioxaspiro[2.4]heptane-4,7-dione and Methyl Tosylcarbamate	238
38.12.2.2	Reactions with Arenes		239
38.12.2.2.1	Method 1:	Oxidation of Arenes by Phthaloyl Peroxide Derivatives	239
38.12.2.2.1.1	Variation 1:	Using Phthaloyl Peroxide	239
38.12.2.2.1.2	Variation 2:	Using 4,5-Dichlorophthaloyl Peroxide	242
38.12.2.2.2	Method 2:	Oxidation of Arenes by 5,6-Dioxaspiro[2.4]heptane-4,7-dione	244
38.12.2.2.3	Method 3:	Dearomatization of 1,3-Benzodioxoles and 2,3-Dihydrobenzofurans	245
38.12.2.3	Reactions with Carbonyl Compounds and Their Derivatives		247
38.12.2.3.1	Method 1:	Oxidative C—O Coupling with 1,3-Dicarbonyl Compounds ..	247
38.12.2.3.1.1	Variation 1:	Single C—O Coupling	247
38.12.2.3.1.2	Variation 2:	Double C—O Coupling	248
38.12.2.3.2	Method 2:	Oxidative C—O Coupling with Enol Ethers	249
38.12.2.3.2.1	Variation 1:	With Silyl Enol Ethers	249
38.12.2.3.2.2	Variation 2:	With Methyl Enol Ethers	251
38.12.2.4	Reactions with Heterocyclic Compounds		252
38.12.2.4.1	Method 1:	Reaction with Furfuryl Alcohols	252
38.12.2.4.1.1	Variation 1:	Catalytic Oxidation Using Phthaloyl Peroxide	252
38.12.2.4.1.2	Variation 2:	Photocatalytic Oxidation by 3,4-Dichlorophthaloyl Peroxide ·	253
38.12.2.4.2	Method 2:	Reactions with Isoxazol-5(4 <i>H</i>)-ones and 2,4-Dihydro-3 <i>H</i> - pyrazol-3-ones	254
38.12.2.4.2.1	Variation 1:	Single C—O Coupling of Malonoyl Peroxides with Isoxazol- 5(4 <i>H</i>)-ones	254
38.12.2.4.2.2	Variation 2:	Double C—O Coupling	255
38.12.2.4.2.3	Variation 3:	Single C—O Coupling of Malonoyl Peroxides with 2,4-Dihydro- 3 <i>H</i> -pyrazol-3-ones	256
38.12.2.4.3	Method 3:	Reaction with 4-Butyl-1,2-diphenylpyrazolidine-3,5-dione ···	258
38.12.2.4.4	Method 4:	Reaction with 1,3-Dimethylpyrimidine-2,4,6(1 <i>H</i> ,3 <i>H</i> ,5 <i>H</i>)- triones	258
38.12.2.4.4.1	Variation 1:	Single C—O Coupling	258
38.12.2.4.4.2	Variation 2:	Double C—O Coupling	260
38.12.2.5	Miscellaneous Reactions		260
38.12.2.5.1	Method 1:	[3 + 2] Cycloaddition of Phthaloyl Peroxides with Azides	260
38.12.2.5.2	Method 2:	Solvolysis of 5,6-Dioxaspiro[2.4]heptane-4,7-dione	262
38.12.2.5.3	Method 3:	Oxidative Addition of Phthaloyl Peroxide to Dimethylplatinum(II) Complexes	262
38.12.2.5.4	Method 4:	Amination of Imidates and Amidines	263

38.12.2.5.4.1	Variation 1:	β -C—H Amination of Imidates Using 2,3-Dioxaspiro[4.4]nonane-1,4-dione	263
38.12.2.5.4.2	Variation 2:	γ -C—H Amination of Imidates by Phthaloyl Peroxide	264
38.12.2.5.4.3	Variation 3:	β -C—H Amination of Amidines Using 2,3-Dioxaspiro[4.4]nonane-1,4-dione	266
38.12.2.5.5	Method 5:	Oxidation of Sulfides	266

Volume 42: Organophosphorus Compounds (incl. RO—P and RN—P)

42.12 Product Class 12: Alkylphosphonium Salts

42.12.8	Alkylphosphonium Salts	2022
	T. Ayad, J.-L. Pirat, and D. Virieux	
42.12.8	Alkylphosphonium Salts	271
42.12.8.1	Non-Heteroatom-Substituted Alkylphosphonium Salts	271
42.12.8.1.1	Method 1: Modification of Phosphonium Salts	271
42.12.8.1.1.1	Variation 1: Modification of (1-Aminoalkyl)phosphonium Salts	271
42.12.8.1.1.2	Variation 2: Electrocyclization of Polyunsaturated Phosphonium Salts ...	272
42.12.8.1.1.3	Variation 3: Intramolecular Addition of Phosphonium Ylides to Electron- Rich Alkynes	273
42.12.8.1.1.4	Variation 4: Reaction of Ylides with 1,3-Carbabetaines	274
42.12.8.2	Fluorinated Alkylphosphonium Salts	275
42.12.8.2.1	Method 1: Alkylation of Phosphines	275
42.12.8.2.1.1	Variation 1: By Reaction of Triphenylphosphine with Bromofluoroalkyl Reagents	275
42.12.8.2.2	Method 2: Modification of Fluorine-Based Phosphonium Salts	276
42.12.8.2.2.1	Variation 1: By Fluorination of Phosphonium Salts	276
42.12.8.2.2.2	Variation 2: By Reaction of Difluoromethylene Phosphobetaine	278
42.12.8.3	Boron-Functionalized Phosphonium Derivatives	280
42.12.8.3.1	Method 1: Synthesis of Acyclic Phosphonium Borates	281
42.12.8.3.1.1	Variation 1: Synthesis of Phosphonium Borates by S_NAr Reaction	281
42.12.8.3.1.2	Variation 2: Synthesis of Acyclic Frustrated Lewis Pairs by Alkylation of Boraphosphines	281
42.12.8.3.1.3	Variation 3: Three-Component Formation of Ethylene-Bridged Frustrated Lewis Pairs	282
42.12.8.3.1.4	Variation 4: Ethylene-Bridged Frustrated Lewis Pairs by Hydroboration of Vinylphosphines	283
42.12.8.3.1.5	Variation 5: Acyclic Frustrated Lewis Pairs by Reaction of Enynes	283
42.12.8.3.2	Method 2: Synthesis of Cyclic Frustrated Lewis Pairs	284

42.12.8.3.2.1	Variation 1:	Synthesis of Cyclic Methylene-Bridged Frustrated Lewis Pairs from [(Di- <i>tert</i> -butylphosphino)methyl]lithium	284
42.12.8.3.2.2	Variation 2:	Synthesis of Methylene-Bridged Frustrated Lewis Pairs by Reaction of a (Phosphinomethyl)borane	285
42.12.8.3.2.3	Variation 3:	Synthesis of Cyclic Ethylene-Bridged Frustrated Lewis Pairs	286
42.12.8.3.2.4	Variation 4:	Cyclic Frustrated Lewis Pairs by Addition to Alkenes	287
42.12.8.3.2.5	Variation 5:	Cyclic Frustrated Lewis Pairs by Addition to Enol Ethers	288
42.12.8.3.2.6	Variation 6:	Cyclic Frustrated Lewis Pairs by Addition to Enynes or Diynes	289
42.12.8.3.2.7	Variation 7:	Synthesis of Cyclic Frustrated Lewis Pairs by Reaction with Alkynes	290
42.12.8.3.2.8	Variation 8:	Cyclic Frustrated Lewis Pairs by Reaction with Epoxides	291
42.12.8.4		Functional Phosphonium Salts by Tandem Reactions	291
42.12.8.4.1	Method 1:	Tandem Michael/ <i>O</i> -Silylation	292
42.12.8.4.2	Method 2:	Tandem Double Michael Addition	293
42.12.8.4.3	Method 3:	Michael Addition/Alkylation Sequence	295
42.12.8.4.4	Method 4:	Tandem Michael/Nucleophilic Addition	296
42.12.8.5		Chiral Quaternary Alkylphosphonium Salts	297
42.12.8.5.1	Method 1:	Alkylphosphonium Salts with a Chiral Binaphthyl Backbone	297
42.12.8.5.2	Method 2:	P-Chirogenic Alkylphosphonium Salts	314
42.12.8.5.3	Method 3:	Alkylphosphonium Salts Derived from Amino Acids	320
42.12.8.5.3.1	Variation 1:	Bifunctional Phosphonium Salts Derived from Chiral Amino Acids	321
42.12.8.5.3.2	Variation 2:	Monoamino Acid Based Thioureido Alkylphosphonium Salts	335
42.12.8.5.3.3	Variation 3:	Dipeptide Alkylphosphonium Salts with an Amide Moiety	343
42.12.8.5.3.4	Variation 4:	Dipeptide Alkylphosphonium Salts with a Thiourea Moiety	354

42.18

Product Class 18: Pentacoordinated Phosphoranes

42.18.2

Pentacoordinated Phosphoranes

2022

R. Pajkert and G.-V. Röschenthaler

42.18.2

Pentacoordinated Phosphoranes

365

42.18.2.1

Method 1: Condensation of Bifunctional Molecules with Tricoordinated Phosphorus Compounds

365

42.18.2.1.1

Variation 1: With Phosphorus(III) Chlorides

366

42.18.2.1.2

Variation 2: With Phosphorous Triamides

369

42.18.2.2

Method 2: Cascade Reaction of Carbonyl Compounds with Functionalized Phospholes

372

42.18.2.3

Method 3: Nucleophilic Substitution with a Phosphoranide Anion

374

42.18.2.4

Method 4: Reactions of Spirohydrophosphoranes and Spirochlorophosphoranes with Transition-Metal Complexes

379

42.18.2.4.1

Variation 1: Substitution with a Metal Carbonyl Anion

379

42.18.2.4.2

Variation 2: Metathesis with a Metal Chloride

380

2022

Updated Section

2022

Completely Revised Contributions

New

New Contributions

42.18.2.4.3	Variation 3:	Nucleophilic Attack onto Phosphite Coordinated to a Transition-Metal Complex	382
42.18.2.5	Method 5:	Nucleophilic Substitution on Sterically Rigid Pentacoordinated Phosphoranes	384
42.18.2.5.1	Variation 1:	Atherton–Todd-Type Reaction	384
42.18.2.5.2	Variation 2:	Sterically Induced Epimerization	388
42.19	Product Class 19: Hexacoordinated Phosphates		
42.19.3	Hexacoordinated Phosphates		2022
	R. Pajkert and G.-V. Röschenhaler		
42.19.3	Hexacoordinated Phosphates		395
42.19.3.1	(Fluoroalkyl)phosphates		396
42.19.3.1.1	Method 1:	Synthesis from Difluorotris(perfluoroethyl)phosphorane	397
42.19.3.1.1.1	Variation 1:	Direct Synthesis from Difluorotris(perfluoroethyl)phosphorane	397
42.19.3.1.1.2	Variation 2:	Stepwise Synthesis from Difluorotris(perfluoroethyl)phosphorane	402
42.19.3.2	Carbene Complexes of Phosphorus(V) Fluorides		403
42.19.3.2.1	Method 1:	Oxidative Addition of α,α -Difluoro Amines to Halophosphines	404
42.19.3.2.1.1	Variation 1:	Oxidative Addition to Fluorophosphines	405
42.19.3.2.1.2	Variation 2:	Oxidative Addition to Chloro- or Bromophosphines	407
42.19.3.2.2	Method 2:	Fluorination of Dimethyl Aroylphosphonates	409
42.19.3.2.3	Method 3:	Thermolytic Decomposition of Imidazolium Hexafluorophosphates	410

Volume 44: Cumulenes and Allenes

Product Class 2: Linear Allenes

44.2.6.11	Applications of Allenes in Organic Synthesis		2022
	M. A. Tius		
44.2.6.11	Applications of Allenes in Organic Synthesis		413
44.2.6.11.1	Method 1:	Diels–Alder Reactions of Allenes	413
44.2.6.11.1.1	Variation 1:	Intermolecular Diels–Alder Reactions of Strained Azacyclic Allenes	413
44.2.6.11.1.2	Variation 2:	Himbert Dearomatizing Intramolecular [4 + 2] Cycloaddition	414
44.2.6.11.1.3	Variation 3:	Hetero-Diels–Alder Reaction of Enallenes	415
44.2.6.11.1.4	Variation 4:	Aldehyde as a Heterodienophile	416
44.2.6.11.1.5	Variation 5:	Gold(I)-Catalyzed [4 + 2] Cycloaddition	416

44.2.6.11.2	Method 2:	[2 + 2] Cycloadditions of Allenes	417
44.2.6.11.2.1	Variation 1:	Thermal [2 + 2] Cycloaddition Reactions of Allenes with Alkenes	417
44.2.6.11.2.2	Variation 2:	Asymmetric Synthesis of Methylenecyclobutanes	417
44.2.6.11.2.3	Variation 3:	Catalytic Asymmetric Synthesis of Methylenecyclobutanes	418
44.2.6.11.2.4	Variation 4:	Photochemical [2 + 2] Allene Cycloaddition	422
44.2.6.11.2.5	Variation 5:	Intramolecular Enantioselective Photochemical [2 + 2] Cycloaddition	422
44.2.6.11.2.6	Variation 6:	Transition-Metal-Catalyzed [2 + 2] Cycloaddition	423
44.2.6.11.3	Method 3:	Nazarov Cyclizations of Allenes	425
44.2.6.11.3.1	Variation 1:	Allenyl Ketones	425
44.2.6.11.3.2	Variation 2:	α -Allenyl Ethers	427
44.2.6.11.4	Method 4:	Pauson–Khand Reactions of Allenes	428
44.2.6.11.4.1	Variation 1:	Rhodium(I)-Catalyzed [2 + 2 + 1] Allene–1,3-Diene Cycloaddition	428
44.2.6.11.4.2	Variation 2:	Rhodium(I)-Catalyzed [2 + 2 + 1] Acyloxyallene Cycloaddition	429
44.2.6.11.4.3	Variation 3:	Axial Chirality Transfer from an Allene	430
44.2.6.11.4.4	Variation 4:	Iron Carbonyl Mediated Intramolecular Pauson–Khand Reaction	431
44.2.6.11.4.5	Variation 5:	Bimolecular Cobalt-Mediated Pauson–Khand Reaction	431
44.2.6.11.5	Method 5:	[3 + 2] Cycloadditions of Allenes	432
44.2.6.11.5.1	Variation 1:	Asymmetric Catalysis by Phosphines	432
44.2.6.11.5.2	Variation 2:	Transition-Metal-Catalyzed [3 + 2] Cycloadditions	436
44.2.6.11.5.3	Variation 3:	[3 + 2] Dipolar Cycloadditions of Cyclohexa-1,2-diene with Nitrones	439
44.2.6.11.6	Method 6:	[4 + 1] Cycloadditions of Allenes	439
44.2.6.11.6.1	Variation 1:	Phosphine-Catalyzed [4 + 1] Allene Cycloadditions	439
44.2.6.11.6.2	Variation 2:	Transition-Metal-Catalyzed [4 + 1] Allene Cycloadditions	440
44.2.6.11.7	Method 7:	[4 + 3] Cycloadditions of Allenes	441
44.2.6.11.7.1	Variation 1:	Via N-Stabilized Oxyallyl Cations	441
44.2.6.11.7.2	Variation 2:	Gold(I)-Catalyzed [4 + 3] Allene Cycloaddition	443
44.2.6.11.8	Method 8:	Claisen Rearrangement of Allenes	445
44.2.6.11.9	Method 9:	Radical Cyclizations of Allenes	446
44.2.6.11.10	Method 10:	Addition of Allene-Derived Nucleophiles to Carbonyls	448
44.2.6.11.10.1	Variation 1:	Additions to Aldehydes	448
44.2.6.11.10.2	Variation 2:	Additions to Imines	453
44.2.6.11.10.3	Variation 3:	Additions to Ketones	454
44.2.6.11.10.4	Variation 4:	Addition to Acyl Fluorides or Carbon Dioxide	456
44.2.6.11.11	Method 11:	Ring-Expansion Reactions Involving Allenes	458
44.2.6.11.12	Method 12:	Additions to the sp^2 -Hybridized Carbon Atoms of Allenes	460
44.2.6.11.12.1	Variation 1:	Addition of Oxygen Nucleophiles	460
44.2.6.11.12.2	Variation 2:	Addition of Nitrogen Nucleophiles	462

44.2.6.11.12.3	Variation 3:	Addition of Trialkylsilyl Nucleophiles	464
44.2.6.11.12.4	Variation 4:	Addition of Boron Nucleophiles	465
44.2.6.11.12.5	Variation 5:	Addition of Carbon Fragments	467
44.2.6.11.13	Method 13:	Allenes as Precursors for Particular Compound Types	472
44.2.6.11.13.1	Variation 1:	Allenes as Precursors of Lactones	472
44.2.6.11.13.2	Variation 2:	Allenes as Precursors of Spirodiepoxides	474
44.2.6.11.13.3	Variation 3:	Allenes as Precursors of Cyclic Ethers, Amines, and Sulfides ..	475
44.2.6.11.13.4	Variation 4:	Allenes as Precursors of Aromatic Heterocycles	482
44.2.6.11.13.5	Variation 5:	Allenes as Precursors of α -Halo and α -Amino Ketones	484
44.2.6.11.13.6	Variation 6:	Allenes as Precursors of Miscellaneous Unsaturated Systems ·	485
44.2.6.11.14	Method 14:	Ene Reactions of Allenes	487
