

## Volume 40a:

### Amines and Ammonium Salts

Preface .....	V
Volume Editors' Preface .....	VII
Table of Contents .....	XI
<b>Introduction</b>	
E. Schaumann .....	1
<b>40.1 Product Class 1: Amino Compounds</b>	
<b>40.1.1 Product Subclass 1: Alkyl- and Cycloalkylamines</b>	
E. Schaumann .....	7
<b>40.1.1.1 Synthesis by Reduction</b>	
<b>40.1.1.1.1 Reduction of Carbonic and Carboxylic Acid Derivatives</b>	
B. Wünsch and C. Geiger .....	23
<b>40.1.1.1.2 Reductive Amination of Carbonyl Compounds</b>	
P. Margaretha .....	65
<b>40.1.1.1.3 Reaction of Acetals with Organometallic Reagents</b>	
G. K. Friestad .....	91
<b>40.1.1.1.4 Hydroaminomethylation of Alkenes</b>	
A. Börner, M. Beller, and B. Wünsch .....	111
<b>40.1.1.1.5 Reduction of Nitrogen-Based Functional Groups</b>	
P. Margaretha .....	119
<b>40.1.1.2 Synthesis by Substitution</b>	
<b>40.1.1.2.1 Synthesis by Substitution of Hydrogen or Metals</b>	
H. Butenschön .....	157
<b>40.1.1.2.2 Substitution of Carbon Functionalities via Solvolysis</b>	
F.-P. Montforts, M. Osmers, and V. A. Azov .....	203
<b>40.1.1.2.3 Substitution of Sulfur or Phosphorus Functionalities</b>	
F.-P. Montforts and M. Osmers .....	233
<b>40.1.1.3 Synthesis by Addition Reactions</b>	
<b>40.1.1.3.1 Hydroamination</b>	
S. Doye .....	241
<b>40.1.1.3.2 Addition of Carbanions to Azomethines</b>	
G. K. Friestad .....	305

<b>40.1.1.3.3</b>	<b>Pericyclic Reactions Involving C=N Units</b>	
	W. Maison .....	343
<b>40.1.1.4</b>	<b>Synthesis by Rearrangement</b>	
	R. Purchase and M. Sainsbury .....	365
<b>40.1.1.5</b>	<b>Synthesis from Other Amino Compounds</b>	
<b>40.1.1.5.1</b>	<b>Resolution of Chiral Amines</b>	
	V. A. Azov .....	419
<b>40.1.1.5.2</b>	<b>The Mannich Reaction</b>	
	J. Ipaktschi and M. R. Saidi .....	435
<b>40.1.1.5.3</b>	<b>Modification of Mannich Adducts</b>	
	J. Ipaktschi and M. R. Saidi .....	479
<b>40.1.1.5.4</b>	<b>Substitution on the Amine Nitrogen</b>	
	S. A. Lawrence .....	501
<b>40.1.2</b>	<b>Product Subclass 2: Propargylic Amines</b>	
	J. Q. Feng and C.-J. Li .....	579
<b>40.1.3</b>	<b>Product Subclass 3: Allylic Amines</b>	
	J. Q. Feng and C.-J. Li .....	587
<b>40.1.4</b>	<b>Product Subclass 4: n-Nitroge-n or n-Phosphorus-Functionalized Alkylamines (<math>n \geq 2</math>)</b>	
	K.-M. Roy .....	615
<b>40.1.5</b>	<b>Product Subclass 5: Aziridines</b>	
	J. B. Sweeney .....	643
<b>40.1.6</b>	<b>Product Subclass 6: Azetidines</b>	
	F. Couty .....	773
<b>40.1.7</b>	<b>Product Subclass 7: Ammonium Compounds and Nitrogen Ylides</b>	
	E. Kruiswijk and J. A. Deck .....	817
	<b>Keyword Index</b> .....	i
	<b>Author Index</b> .....	lix
	<b>Abbreviations</b> .....	cvi

## Table of Contents

### Introduction

E. Schaumann

---

Introduction .....	1
--------------------	---

### 40.1 Product Class 1: Amino Compounds

---

#### 40.1.1 Product Subclass 1: Alkyl- and Cycloalkylamines

E. Schaumann

---

40.1.1 Product Subclass 1: Alkyl- and Cycloalkylamines .....	7
--	---

#### 40.1.1.1 Synthesis by Reduction

---

##### 40.1.1.1.1 Reduction of Carbonic and Carboxylic Acid Derivatives

B. Wünsch and C. Geiger

---

40.1.1.1.1 Reduction of Carbonic and Carboxylic Acid Derivatives .....	23
--	----

40.1.1.1.1.1 Method 1: Reduction of Carbon Monoxide Gas .....	23
---	----

40.1.1.1.1.2 Method 2: Reduction of Carbamates .....	23
--	----

40.1.1.1.1.2.1 Variation 1: Reduction with Aluminum Hydrides .....	24
--	----

40.1.1.1.1.2.2 Variation 2: Catalytic Hydrogenation .....	25
---	----

40.1.1.1.1.2.3 Variations 3: Miscellaneous Reductions .....	27
---	----

40.1.1.1.1.3 Method 3: Reduction of Isocyanates or Isothiocyanates .....	28
--	----

40.1.1.1.1.4 Method 4: Reduction of Nitriles .....	29
--	----

40.1.1.1.1.4.1 Variation 1: Catalytic Hydrogenation .....	29
---	----

40.1.1.1.1.4.2 Variation 2: Reduction with Aluminum Hydrides .....	34
--	----

40.1.1.1.1.4.3 Variation 3: Reduction with Boranes .....	38
--	----

40.1.1.1.1.4.4 Variation 4: Reduction with Borohydrides .....	41
---	----

40.1.1.1.1.4.5 Variation 5: The Kulinkovich-de Meijere Reaction .....	44
---	----

40.1.1.1.1.5 Method 5: Reduction of Amides or Thioamides .....	45
--	----

40.1.1.1.1.5.1 Variation 1: Reduction with Aluminum Hydrides .....	45
--	----

40.1.1.1.1.5.2 Variation 2: Reduction with Borane Derivatives .....	48
---	----

40.1.1.1.1.5.3 Variation 3: Reduction with Hydrosilanes .....	49
---	----

40.1.1.1.1.5.4 Variation 4: Reduction of Thioamides .....	50
---	----

40.1.1.1.1.5.5 Variation 5: The Kulinkovich-de Meijere Reaction .....	51
---	----

40.1.1.1.1.6 Method 6: Reduction of Imides .....	54
--	----

40.1.1.1.1.7 Method 7: Reduction of Imidates and Imidoyl Chlorides .....	55
--	----

#### 40.1.1.2 Reductive Amination of Carbonyl Compounds

P. Margaretha

---

40.1.1.2 Reductive Amination of Carbonyl Compounds .....	65
--	----

40.1.1.2.1 Alkylamines from Carbonyl Compounds by Direct Reductive Amination .....	65
--	----

<b>40.1.1.2.1.1</b>	Method 1:	Direct Reductive Amination by Catalytic Hydrogenation .....	66
<b>40.1.1.2.1.1.1</b>	Variation 1:	Hydrogenation Using Heterogeneous Metal Catalysts .....	66
<b>40.1.1.2.1.1.2</b>	Variation 2:	Hydrogenation Using Homogeneous Metal Complex Catalysts	67
<b>40.1.1.2.1.1.3</b>	Variation 3:	Palladium-Catalyzed Transfer Hydrogenation .....	68
<b>40.1.1.2.1.2</b>	Method 2:	Direct Reductive Amination Using Silanes as a Hydrogen Source	69
<b>40.1.1.2.1.2.1</b>	Variation 1:	Using Polymethylhydrosiloxane .....	69
<b>40.1.1.2.1.2.2</b>	Variation 2:	Using Aminohydrosilanes .....	69
<b>40.1.1.2.1.2.3</b>	Variation 3:	Using Triethylsilane .....	70
<b>40.1.1.2.1.3</b>	Method 3:	Direct Reductive Amination with Borohydride or Borane Reducing Agents .....	70
<b>40.1.1.2.1.3.1</b>	Variation 1:	Using Sodium Cyanoborohydride .....	70
<b>40.1.1.2.1.3.2</b>	Variation 2:	Using Sodium Borohydride .....	72
<b>40.1.1.2.1.3.3</b>	Variation 3:	Using Zirconium(II) or Copper(I) Borohydrides .....	73
<b>40.1.1.2.1.3.4</b>	Variation 4:	Using Sodium Triacyloxyborohydrides .....	74
<b>40.1.1.2.1.3.5</b>	Variation 5:	Using Aminoboranes .....	74
<b>40.1.1.2.2</b>		Primary Alkylamines from Oximes and O-Alkyloximes .....	75
<b>40.1.1.2.2.1</b>		Primary Alkylamines from Oximes .....	76
<b>40.1.1.2.2.1.1</b>	Method 1:	Catalytic Hydrogenation .....	76
<b>40.1.1.2.2.1.2</b>	Method 2:	Catalytic Transfer Hydrogenation .....	77
<b>40.1.1.2.2.1.3</b>	Method 3:	Reduction with Metallic Zinc .....	77
<b>40.1.1.2.2.1.3.1</b>	Variation 1:	Using Zinc in the Presence of Ammonia .....	77
<b>40.1.1.2.2.1.3.2</b>	Variation 2:	Using Zinc in the Presence of a Carboxylic Acid .....	78
<b>40.1.1.2.2.1.4</b>	Method 4:	Reductions with Borane or Borohydrides .....	79
<b>40.1.1.2.2.1.4.1</b>	Variation 1:	Reduction with Borane .....	79
<b>40.1.1.2.2.1.4.2</b>	Variation 2:	Reduction with Borohydrides .....	79
<b>40.1.1.2.2.1.5</b>	Method 5:	Reductions with Aluminum Trihydride or Hydroaluminates .....	80
<b>40.1.1.2.2.2</b>		Primary Alkylamines from O-Alkyloximes .....	81
<b>40.1.1.2.3</b>		Secondary Alkylamines from N-Alkylidenealkylamines by Reduction .....	82
<b>40.1.1.2.3.1</b>	Method 1:	Stereorandom Reduction of N-Alkylidenealkylamines to Secondary Alkylamines .....	82
<b>40.1.1.2.3.1.1</b>	Variation 1:	Via Transfer Hydrogenation .....	82
<b>40.1.1.2.3.1.2</b>	Variation 2:	By Reduction with Hydrides .....	83
<b>40.1.1.2.3.2</b>	Method 2:	Enantioselective Reduction of N-Alkylidenealkylamines to Secondary Alkylamines .....	84
<b>40.1.1.2.4</b>		Tertiary Alkylamines from Enamines by Reduction .....	85
<b>40.1.1.2.4.1</b>	Method 1:	Amines from Enamines by Catalytic Hydrogenation .....	85
<b>40.1.1.2.4.2</b>	Method 2:	Amines from Enamines by Enantioselective (Asymmetric) Catalytic Hydrogenation .....	86
<b>40.1.1.2.4.3</b>	Method 3:	Amines from Enamines Using Other Reducing Agents .....	87
<b>40.1.1.3</b>		<b>Reaction of Acetals with Organometallic Reagents</b>	
		G. K. Friestad	
<b>40.1.1.3.1</b>		<b>Reaction of Acetals with Organometallic Reagents</b> .....	91
<b>40.1.1.3.1</b>	Method 1:	Additions to N,O-Acetals .....	91

---

<b>40.1.1.3.1.1</b>	Variation 1: Addition to <i>N,O</i> -Acetals Incorporating a Tertiary Amine Function .....	91
<b>40.1.1.3.1.2</b>	Variation 2: Addition to <i>N,O</i> -Acetals Incorporating a Secondary Amine Function .....	95
<b>40.1.1.3.1.3</b>	Variation 3: Development of Asymmetric Additions to <i>N,O</i> -Acetals .....	98
<b>40.1.1.3.2</b>	Method 2: Additions to <i>N,N</i> -Acetals .....	99
<b>40.1.1.3.3</b>	Method 3: Reductive Arylation of <i>N,O</i> -Acetals: The Tscherniac–Einhorn Reaction .....	100
<b>40.1.1.3.3.1</b>	Variation 1: Asymmetric Equivalents of the Tscherniac–Einhorn Reaction ..	105
<b>40.1.1.4</b>	<b>Hydroaminomethylation of Alkenes</b>	
	A. Börner, M. Beller, and B. Wünsch	
<b>40.1.1.4</b>	<b>Hydroaminomethylation of Alkenes</b> .....	111
<b>40.1.1.4.1</b>	Method 1: Hydroaminomethylation .....	111
<b>40.1.1.5</b>	<b>Reduction of Nitrogen-Based Functional Groups</b>	
	P. Margaretha	
<b>40.1.1.5</b>	<b>Reduction of Nitrogen-Based Functional Groups</b> .....	119
<b>40.1.1.5.1</b>	Reduction of Nitroalkanes .....	119
<b>40.1.1.5.1.1</b>	Method 1: Cathodic Reduction .....	120
<b>40.1.1.5.1.2</b>	Method 2: Catalytic Hydrogenation .....	120
<b>40.1.1.5.1.3</b>	Method 3: Transfer Hydrogenation .....	122
<b>40.1.1.5.1.4</b>	Method 4: Reduction Using Borohydrides and an Additional Catalyst ..	124
<b>40.1.1.5.1.4.1</b>	Variation 1: Using Sodium Borohydride .....	124
<b>40.1.1.5.1.4.2</b>	Variation 2: Using Borohydride Exchange Resin .....	125
<b>40.1.1.5.1.4.3</b>	Variation 3: Using Zinc(II) Borohydride–Pyridine .....	125
<b>40.1.1.5.1.5</b>	Method 5: Reduction Using Lithium Aluminum Hydride .....	125
<b>40.1.1.5.1.6</b>	Method 6: Reduction Using Aluminum Amalgam Promoted by Ultrasound .....	127
<b>40.1.1.5.1.7</b>	Method 7: Reduction Using Tin–Hydrochloric Acid .....	128
<b>40.1.1.5.1.8</b>	Method 8: Reduction Using Samarium(II) Iodide .....	128
<b>40.1.1.5.2</b>	Reduction of Mesoionic 2-Alkyl-1,2,3-triazines .....	130
<b>40.1.1.5.3</b>	Reduction of Nitrosoalkanes .....	131
<b>40.1.1.5.4</b>	Reduction of Alkyl Azides .....	131
<b>40.1.1.5.4.1</b>	Method 1: Catalytic Hydrogenation .....	131
<b>40.1.1.5.4.2</b>	Method 2: Transfer Hydrogenation .....	133
<b>40.1.1.5.4.3</b>	Method 3: Reduction Using Boranes or Boronates .....	135
<b>40.1.1.5.4.3.1</b>	Variation 1: Using Dichloroborane–Dimethyl Sulfide .....	135
<b>40.1.1.5.4.3.2</b>	Variation 2: Using Lithium Aminoborohydrides .....	136
<b>40.1.1.5.4.3.3</b>	Variation 3: Using Sodium Borohydride .....	137
<b>40.1.1.5.4.3.4</b>	Variation 4: Using Borohydride Exchange Resin–Nickel(II) Acetate .....	139
<b>40.1.1.5.4.3.5</b>	Variation 5: Using Zinc(II) Borohydride .....	139
<b>40.1.1.5.4.4</b>	Method 4: Reduction Using Lithium Aluminum Hydride .....	140
<b>40.1.1.5.4.5</b>	Method 5: Reduction Using Tributyltin Hydride .....	141

---

<b>40.1.1.5.4.6</b>	Method 6:	Reduction Using Metals .....	141
<b>40.1.1.5.4.7</b>	Method 7:	Reduction Using Triphenylphosphine .....	143
<b>40.1.1.5.4.8</b>	Method 8:	Reduction Using Hydrogen Sulfide .....	144
<b>40.1.1.5.4.9</b>	Method 9:	Reduction Using Propane-1,3-dithiol .....	144
<b>40.1.1.5.4.10</b>	Method 10:	Reduction Using Low-Valent Metal Ion Salts .....	145
<b>40.1.1.5.4.11</b>	Methods 11:	Miscellaneous Methods .....	145
<b>40.1.1.5.5</b>		Reduction of 1,2-Diazenes .....	145
<b>40.1.1.5.6</b>		Reduction of Hydroxylamines .....	146
<b>40.1.1.5.7</b>		Reduction of Amine Oxides .....	147
<b>40.1.1.5.8</b>		Reduction of <i>N</i> -Nitro and <i>N</i> -Nitroso Compounds .....	149
<b>40.1.1.5.9</b>		Reduction of Alkylhydrazines .....	149
<b>40.1.1.5.10</b>		Reduction of Sulfonamides .....	153

---

**40.1.1.2** **Synthesis by Substitution****40.1.1.2.1** **Synthesis by Substitution of Hydrogen or Metals**

H. Butenschön

---

<b>40.1.1.2.1</b>		<b>Synthesis by Substitution of Hydrogen or Metals</b>	
<b>40.1.1.2.1.1</b>	Method 1:	$\alpha$ -Amination of Carbonyl Compounds and Analogues .....	157
<b>40.1.1.2.1.1.1</b>	Variation 1:	Amination with Azodicarboxylates .....	157
<b>40.1.1.2.1.1.2</b>	Variation 2:	Amination with $R_2NL$ Compounds (L= Leaving Group) .....	167
<b>40.1.1.2.1.1.3</b>	Variation 3:	Amination with Azides Followed by Reduction .....	170
<b>40.1.1.2.1.1.4</b>	Variation 4:	Amination with Oxaziridines .....	173
<b>40.1.1.2.1.1.5</b>	Variation 5:	Amination with 1-Chloro-1-nitroso Reagents .....	175
<b>40.1.1.2.1.1.6</b>	Variation 6:	Amination with Lithium <i>N</i> -( <i>tert</i> -Butoxycarbonyl)-O-tosylhydroxyamide .....	176
<b>40.1.1.2.1.1.7</b>	Variation 7:	Amination with Nitridomanganese(V) Complexes .....	176
<b>40.1.1.2.1.1.8</b>	Variations 8:	Other Variations .....	177
<b>40.1.1.2.1.2</b>	Method 2:	Substitution of Hydrogen Other Than the $\alpha$ -Hydrogen of Carbonyl Compounds .....	177
<b>40.1.1.2.1.2.1</b>	Variation 1:	Amination with Azidotrimethylsilane Followed by Reduction ..	178
<b>40.1.1.2.1.2.2</b>	Variation 2:	Amination of Unactivated C–H Groups with Haloamines ..	180
<b>40.1.1.2.1.2.3</b>	Variation 3:	Rhodium(II)-, Ruthenium(II)-, or Manganese(III)-Catalyzed Amination .....	181
<b>40.1.1.2.1.2.4</b>	Variations 4:	Miscellaneous Variations .....	184
<b>40.1.1.2.1.3</b>	Method 3:	Substitution of Metal Atoms .....	185
<b>40.1.1.2.1.3.1</b>	Variation 1:	Substitution of Boron .....	186
<b>40.1.1.2.1.3.2</b>	Variation 2:	Substitution of Zinc .....	187
<b>40.1.1.2.1.3.3</b>	Variation 3:	Substitution of Copper .....	190
<b>40.1.1.2.1.3.4</b>	Variation 4:	Substitution of Magnesium .....	191
<b>40.1.1.2.1.3.5</b>	Variation 5:	Substitution of Lithium .....	195
<b>40.1.1.2.1.3.6</b>	Variation 6:	Substitution of Other Metal Atoms .....	197

---

---

<b>40.1.1.2.2</b>	<b>Substitution of Carbon Functionalities via Solvolysis</b>	
	F.-P. Montforts, M. Osmers, and V. A. Azov	
<hr/>		
<b>40.1.1.2.2</b>	<b>Substitution of Carbon Functionalities via Solvolysis</b>	203
<b>40.1.1.2.2.1</b>	Method 1: Substitution of Carbamates	203
<b>40.1.1.2.2.1.1</b>	Variation 1: Cleavage by Nucleophilic Substitution	203
<b>40.1.1.2.2.1.2</b>	Variation 2: Cleavage by Protic or Lewis Acids	206
<b>40.1.1.2.2.1.3</b>	Variation 3: Cleavage by Base-Induced $\beta$ -Elimination	210
<b>40.1.1.2.2.1.4</b>	Variation 4: Cleavage by Remote Attack of Bases or Nucleophiles at the Carbamate Group	213
<b>40.1.1.2.2.2</b>	Method 2: Substitution of Carboxylic Acid N-Derivatives	219
<b>40.1.1.2.2.2.1</b>	Variation 1: Acyclic Carboxylic Acid N-Derivatives	219
<b>40.1.1.2.2.2.2</b>	Variation 2: Cyclic Carboxylic Acid N-Derivatives (Cyclic Imide Derivatives)	226
<b>40.1.1.2.2.2.3</b>	Variation 3: Amidines	229
<hr/>		
<b>40.1.1.2.3</b>	<b>Substitution of Sulfur or Phosphorus Functionalities</b>	
	F.-P. Montforts and M. Osmers	
<hr/>		
<b>40.1.1.2.3</b>	<b>Substitution of Sulfur or Phosphorus Functionalities</b>	233
<b>40.1.1.2.3.1</b>	Method 1: Cleavage of Sulfonic, Sulfinic, and Sulfenic Acid N-Derivatives	233
<b>40.1.1.2.3.2</b>	Method 2: Cleavage of Phosphoric and Phosphinic Acid Amides	237
<hr/>		
<b>40.1.1.3</b>	<b>Synthesis by Addition Reactions</b>	
<hr/>		
<b>40.1.1.3.1</b>	<b>Hydroamination</b>	
	S. Doye	
<hr/>		
<b>40.1.1.3.1</b>	<b>Hydroamination</b>	241
<b>40.1.1.3.1.1</b>	Method 1: Hydroamination of Alkenes	241
<b>40.1.1.3.1.1.1</b>	Variation 1: Catalysis by Acids	241
<b>40.1.1.3.1.1.2</b>	Variation 2: Catalysis by Bases	243
<b>40.1.1.3.1.1.3</b>	Variation 3: Catalysis by Calcium Complexes	245
<b>40.1.1.3.1.1.4</b>	Variation 4: Catalysis by Rare Earth Metal Complexes	246
<b>40.1.1.3.1.1.5</b>	Variation 5: Catalysis by Actinide Complexes	256
<b>40.1.1.3.1.1.6</b>	Variation 6: Catalysis by Group 4 Metal Complexes	257
<b>40.1.1.3.1.1.7</b>	Variation 7: Catalysis by Group 8 Metal Complexes	259
<b>40.1.1.3.1.1.8</b>	Variation 8: Catalysis by Group 9 Metal Complexes	260
<b>40.1.1.3.1.1.9</b>	Variation 9: Catalysis by Group 10 Metal Complexes	261
<b>40.1.1.3.1.1.10</b>	Variation 10: Catalysis by Group 11 Metal Complexes	263
<b>40.1.1.3.1.1.11</b>	Variation 11: Catalysis by Group 12 Metal Complexes	264
<b>40.1.1.3.1.2</b>	Method 2: Hydroamination of Vinylarenes	264
<b>40.1.1.3.1.2.1</b>	Variation 1: Catalysis by Acids	264
<b>40.1.1.3.1.2.2</b>	Variation 2: Catalysis by Bases	265
<b>40.1.1.3.1.2.3</b>	Variation 3: Catalysis by Rare Earth Metal Complexes	266
<b>40.1.1.3.1.2.4</b>	Variation 4: Catalysis by Hafnium Complexes	268
<b>40.1.1.3.1.2.5</b>	Variation 5: Catalysis by Ruthenium Complexes	269
<b>40.1.1.3.1.2.6</b>	Variation 6: Catalysis by Rhodium Complexes	270

---

<b>40.1.1.3.1.2.7</b>	Variation 7: Catalysis by Palladium or Platinum Complexes .....	272
<b>40.1.1.3.1.2.8</b>	Variation 8: Catalysis by Copper Complexes .....	273
<b>40.1.1.3.1.2.9</b>	Variation 9: Catalysis by Bismuth Complexes .....	274
<b>40.1.1.3.1.2.10</b>	Variation 10: Catalysis by <i>N</i> -Bromosuccinimide .....	274
<b>40.1.1.3.1.2.11</b>	Variation 11: Photoamination of Vinylarenes .....	275
<b>40.1.1.3.1.3</b>	Method 3: Hydroamination of 1,3-Dienes .....	275
<b>40.1.1.3.1.3.1</b>	Variation 1: Catalysis by Acids .....	276
<b>40.1.1.3.1.3.2</b>	Variation 2: Catalysis by Bases .....	276
<b>40.1.1.3.1.3.3</b>	Variation 3: Catalysis by Rare Earth Metal Complexes .....	277
<b>40.1.1.3.1.3.4</b>	Variation 4: Catalysis by Group 10 Metal Complexes .....	278
<b>40.1.1.3.1.3.5</b>	Variation 5: Catalysis by Gold Complexes .....	279
<b>40.1.1.3.1.3.6</b>	Variation 6: Catalysis by Bismuth Complexes .....	279
<b>40.1.1.3.1.3.7</b>	Variation 7: Photoamination of 1,3-Dienes .....	280
<b>40.1.1.3.1.4</b>	Method 4: Hydroamination of Cyclohepta-1,3,5-triene .....	280
<b>40.1.1.3.1.5</b>	Method 5: Hydroamination of Allenes .....	281
<b>40.1.1.3.1.5.1</b>	Variation 1: Catalysis by Rare Earth Metal Complexes .....	281
<b>40.1.1.3.1.5.2</b>	Variation 2: Catalysis by Titanium or Zirconium Complexes .....	282
<b>40.1.1.3.1.5.3</b>	Variation 3: Catalysis by Ruthenium Complexes .....	283
<b>40.1.1.3.1.5.4</b>	Variation 4: Catalysis by Palladium Complexes .....	284
<b>40.1.1.3.1.5.5</b>	Variation 5: Catalysis by Gold or Silver Complexes .....	286
<b>40.1.1.3.1.6</b>	Method 6: Hydroamination of Allenes and Subsequent Reduction .....	287
<b>40.1.1.3.1.7</b>	Method 7: Hydroamination of Alkynes .....	288
<b>40.1.1.3.1.8</b>	Method 8: Hydroamination of Alkynes and Subsequent Reduction .....	289
<b>40.1.1.3.1.8.1</b>	Variation 1: Catalysis by Rare Earth Metal Complexes .....	289
<b>40.1.1.3.1.8.2</b>	Variation 2: Catalysis by Group 4 Metal Complexes .....	290
<b>40.1.1.3.1.8.3</b>	Variation 3: Catalysis by Iridium Complexes .....	292
<b>40.1.1.3.1.8.4</b>	Variation 4: Catalysis by Silver Complexes .....	293
<b>40.1.1.3.1.9</b>	Method 9: Hydroamination of Alkynes and Nucleophilic Addition .....	293
<b>40.1.1.3.1.10</b>	Method 10: Hydroamination of Enynes .....	294
<b>40.1.1.3.1.11</b>	Method 11: Hydroamination of Methylenecyclopropanes .....	295
<b>40.1.1.3.1.11.1</b>	Variation 1: Catalysis by Rare Earth Metal Complexes .....	295
<b>40.1.1.3.1.11.2</b>	Variation 2: Catalysis by Palladium Complexes .....	296
<b>40.1.1.3.1.11.3</b>	Variation 3: Catalysis by Gold Complexes .....	296
<b>40.1.1.3.1.12</b>	Method 12: Hydroamination of Cyclopropenes .....	297
<b>40.1.1.3.1.13</b>	Method 13: Hydroamination of Cyclopropanes .....	297
<b>40.1.1.3.1.13.1</b>	Variation 1: Catalysis by Palladium Complexes .....	297
<b>40.1.1.3.1.13.2</b>	Variation 2: Photoamination of Cyclopropanes .....	298
<b>40.1.1.3.1.14</b>	Method 14: Hydroamination of Aromatic Compounds .....	298

### **40.1.1.3.2      Addition of Carbanions to Azomethines**

G. K. Friestad

---

<b>40.1.1.3.2</b>	<b>Addition of Carbanions to Azomethines</b> .....	305
<b>40.1.1.3.2.1</b>	Azomethines for Asymmetric Addition of Carbanions .....	305
<b>40.1.1.3.2.1.1</b>	Method 1: Use of <i>N</i> -(1-Phenylethyl)imines .....	305
<b>40.1.1.3.2.1.2</b>	Method 2: Use of <i>N</i> -Sulfinylimines .....	307
<b>40.1.1.3.2.1.3</b>	Method 3: Use of SAMP and RAMP Hydrazones .....	308

<b>40.1.1.3.2.1.4</b>	Method 4: Use of Chiral Acylhydrazones .....	309
<b>40.1.1.3.2.1.5</b>	Method 5: Use of Chiral Oxime O-Ethers .....	310
<b>40.1.1.3.2.1.6</b>	Method 6: Use of Chiral Reagents and Catalysts .....	311
<b>40.1.1.3.2.2</b>	Addition of Organometallic or Radical Reagents to Azomethines .....	313
<b>40.1.1.3.2.2.1</b>	Method 1: Addition of Allylmetal Reagents .....	313
<b>40.1.1.3.2.2.1.1</b>	Variation 1: Of Allyllithium and Allylmagnesium Reagents .....	314
<b>40.1.1.3.2.2.1.2</b>	Variation 2: Of Allylboranes .....	317
<b>40.1.1.3.2.2.1.3</b>	Variation 3: Of Allylstannanes .....	319
<b>40.1.1.3.2.2.1.4</b>	Variation 4: Of Allylsilanes .....	322
<b>40.1.1.3.2.2.1.5</b>	Variation 5: Of Other Allylic Reagents .....	325
<b>40.1.1.3.2.2.2</b>	Method 2: Addition of Alkyl- and Arylmetal Reagents .....	326
<b>40.1.1.3.2.2.2.1</b>	Variation 1: Of Organolithiums and Grignard Reagents .....	326
<b>40.1.1.3.2.2.2.2</b>	Variation 2: Of Organozinc Reagents .....	327
<b>40.1.1.3.2.2.2.3</b>	Variation 3: Of Organocerium Reagents .....	329
<b>40.1.1.3.2.2.2.4</b>	Variation 4: Of Organotransition Metal Species .....	331
<b>40.1.1.3.2.2.2.5</b>	Variation 5: Of Other Organometallic Reagents .....	333
<b>40.1.1.3.2.2.3</b>	Method 3: Radical Alkyl Additions .....	333
<b>40.1.1.3.3</b>	<b>Pericyclic Reactions Involving C=N Units</b>	
	W. Maison	
<b>40.1.1.3.3</b>	<b>Pericyclic Reactions Involving C=N Units</b> .....	343
<b>40.1.1.3.3.1</b>	Method 1: Cycloaddition Reactions of N-Acylimines .....	343
<b>40.1.1.3.3.2</b>	Method 2: Cycloaddition Reactions of N-(Alkoxy carbonyl)imines .....	345
<b>40.1.1.3.3.2.1</b>	Variation 1: Lewis Acid Mediated Cycloaddition of Biscarbamates .....	346
<b>40.1.1.3.3.2.2</b>	Variation 2: Enantioselective Catalytic Cycloaddition .....	347
<b>40.1.1.3.3.3</b>	Method 3: Cycloaddition Reactions of N-Sulfonylimines or N-Phosphorylimines .....	348
<b>40.1.1.3.3.3.1</b>	Variation 1: Diastereoselective Cycloaddition Reactions of N-Tosylimines ..	349
<b>40.1.1.3.3.3.2</b>	Variation 2: Enantioselective Catalytic Cycloaddition Reactions of N-Tosylimines .....	350
<b>40.1.1.3.3.4</b>	Method 4: Cycloaddition Reactions of N-Alkylimines, N-Arylimines, or Their Salts .....	351
<b>40.1.1.3.3.4.1</b>	Variation 1: Acid-Catalyzed Imino-Diels–Alder Reactions in Aqueous Media ..	352
<b>40.1.1.3.3.4.2</b>	Variation 2: Diastereoselective Cycloaddition Reactions of N-Alkyl- or N-Arylimines .....	353
<b>40.1.1.3.3.4.3</b>	Variation 3: Enantioselective Catalytic Cycloaddition Reactions of Alkylated and Arylated Imines .....	356
<b>40.1.1.3.3.5</b>	Method 5: Cycloaddition Reactions of C-Heteroatom-Substituted Imines ..	357
<b>40.1.1.4</b>	<b>Synthesis by Rearrangement</b>	
	R. Purchase and M. Sainsbury	
<b>40.1.1.4</b>	<b>Synthesis by Rearrangement</b> .....	365
<b>40.1.1.4.1</b>	Rearrangements from Nitrogen to Carbon .....	365
<b>40.1.1.4.1.1</b>	Method 1: Stevens and Sommelet–Hauser Rearrangements .....	365

<b>40.1.1.4.1.2</b>	Method 2: [2,3]-Aza-Wittig and Related Sigmatropic Rearrangements .....	379
<b>40.1.1.4.1.2.1</b>	Variation 1: [2,3]-Aza-Wittig Rearrangements .....	379
<b>40.1.1.4.1.2.2</b>	Variation 2: Rearrangements Involving Compounds Containing Sulfur or Selenium .....	380
<b>40.1.1.4.1.3</b>	Method 3: Rearrangements of Phenylhydrazines and Hydrazobenzenes .....	382
<b>40.1.1.4.1.4</b>	Method 4: Overman Rearrangement (Aza-Oxa-Cope Rearrangement) .....	382
<b>40.1.1.4.1.5</b>	Method 5: Rearrangements of N-Substituted Amines .....	388
<b>40.1.1.4.1.5.1</b>	Variation 1: Fischer–Hepp Rearrangement .....	388
<b>40.1.1.4.1.5.2</b>	Variation 2: Hofmann–Martius Rearrangement .....	389
<b>40.1.1.4.1.5.3</b>	Variation 3: Reilly–Hickinbottom and Orton Rearrangements .....	391
<b>40.1.1.4.1.5.4</b>	Variation 4: Bamberger Rearrangement .....	391
<b>40.1.1.4.1.5.5</b>	Variation 5: Hofmann–Löffler–Freytag Rearrangement .....	392
<b>40.1.1.4.2</b>	Rearrangements from Carbon to Nitrogen .....	393
<b>40.1.1.4.2.1</b>	Method 1: Stieglitz Rearrangements .....	393
<b>40.1.1.4.2.2</b>	Method 2: Beckmann Rearrangement .....	393
<b>40.1.1.4.2.3</b>	Method 3: Neber Rearrangement .....	394
<b>40.1.1.4.2.4</b>	Method 4: Hofmann, Curtius, Schmidt, and Lossen Rearrangements .....	395
<b>40.1.1.4.2.4.1</b>	Variation 1: Hofmann Rearrangement .....	396
<b>40.1.1.4.2.4.2</b>	Variation 2: Lossen Rearrangement .....	401
<b>40.1.1.4.2.4.3</b>	Variation 3: Curtius Rearrangement .....	404
<b>40.1.1.4.2.4.4</b>	Variation 4: Schmidt Rearrangement .....	411

**40.1.1.5** **Synthesis from Other Amino Compounds**

---

**40.1.1.5.1** **Resolution of Chiral Amines**

V. A. Azov

<b>40.1.1.5.1</b>	<b>Resolution of Chiral Amines</b> .....	419
<b>40.1.1.5.1.1</b>	Method 1: Resolution by Diastereomeric Crystallization .....	419
<b>40.1.1.5.1.2</b>	Method 2: Kinetic Resolution .....	421
<b>40.1.1.5.1.2.1</b>	Variation 1: Enzymatic Kinetic Resolution .....	421
<b>40.1.1.5.1.2.2</b>	Variation 2: Dynamic Kinetic Resolution Using Enzymes .....	425
<b>40.1.1.5.1.2.3</b>	Variation 3: Nonenzymatic Kinetic Resolution .....	427
<b>40.1.1.5.1.3</b>	Method 3: Analytical and Preparative Chromatographic Separation .....	428
<b>40.1.1.5.1.4</b>	Method 4: Analysis and Separation of Diastereomeric Amine Derivatives	429
<b>40.1.1.5.1.4.1</b>	Variation 1: Using Chiral Solvating Agents .....	430
<b>40.1.1.5.1.4.2</b>	Variation 2: Using Chiral Derivatizing Agents .....	431

**40.1.1.5.2** **The Mannich Reaction**

J. Ipaktschi and M. R. Saidi

<b>40.1.1.5.2</b>	<b>The Mannich Reaction</b> .....	435
<b>40.1.1.5.2.1</b>	Direct Organocatalytic Enantioselective Mannich Reaction .....	435
<b>40.1.1.5.2.1.1</b>	Method 1: $\alpha$ -Aminoalkylation of Ketones .....	436
<b>40.1.1.5.2.1.1.1</b>	Variation 1: Proline-Catalyzed Aminoalkylation of Aliphatic Ketones .....	436
<b>40.1.1.5.2.1.1.2</b>	Variation 2: Chiral Brønsted Acid Catalyzed Aminoalkylation of Ketones ..	438

<b>40.1.1.5.2.1.1.3</b>	Variation 3:	Aminoalkylation under High Pressure .....	439
<b>40.1.1.5.2.1.2</b>	Method 2:	$\alpha$ -Aminomethylation of Ketones .....	440
<b>40.1.1.5.2.1.2.1</b>	Variation 1:	Proline-Catalyzed $\alpha$ -Aminomethylation .....	440
<b>40.1.1.5.2.1.2.2</b>	Variation 2:	$\alpha$ -Aminomethylation of Ketones under Microwave Irradiation	441
<b>40.1.1.5.2.1.3</b>	Method 3:	$\alpha$ -Aminoalkylation of Hydroxy and Protected Amino Ketones	442
<b>40.1.1.5.2.1.3.1</b>	Variation 1:	Synthesis of <i>syn</i> -1,2-Amino Alcohols .....	442
<b>40.1.1.5.2.1.3.2</b>	Variation 2:	Synthesis of Protected Amino Sugars by Direct Mannich Reaction .....	443
<b>40.1.1.5.2.1.3.3</b>	Variation 3:	Synthesis of Chiral <i>syn</i> -1,2-Diamines .....	445
<b>40.1.1.5.2.1.3.4</b>	Variation 4:	Synthesis of <i>anti</i> -1,2-Amino Alcohols .....	446
<b>40.1.1.5.2.1.4</b>	Method 4:	Asymmetric Cross-Mannich Reaction of Aldehydes .....	447
<b>40.1.1.5.2.1.4.1</b>	Variation 1:	Stereoselective Synthesis of $\beta$ -Amino Alcohols .....	448
<b>40.1.1.5.2.1.4.2</b>	Variation 2:	Self-Mannich Reaction of Aliphatic and $\alpha$ -Hydroxy Aldehydes	449
<b>40.1.1.5.2.1.4.3</b>	Variation 3:	One-Pot Direct Synthesis of $\beta$ -Formyl- $\alpha$ -amino Acids .....	449
<b>40.1.1.5.2.2</b>	Indirect Organocatalytic Enantioselective Mannich Reaction with Preformed Reagents .....	451	
<b>40.1.1.5.2.2.1</b>	Method 1:	$\beta$ -Amino Carbonyl Derivatives from Reactions of <i>N</i> -( <i>tert</i> -Butoxycarbonyl)-Protected Imines .....	451
<b>40.1.1.5.2.2.1.1</b>	Variation 1:	Proline-Catalyzed Addition of Aldehydes or Ketones .....	451
<b>40.1.1.5.2.2.1.2</b>	Variation 2:	Chiral Brønsted Acid Catalyzed Reaction of <i>N</i> -( <i>tert</i> -Butoxycarbonyl)-Protected Aldimines .....	452
<b>40.1.1.5.2.2.2</b>	Method 2:	$\alpha$ -Amino Acids by <i>syn</i> -Selective Synthesis .....	453
<b>40.1.1.5.2.2.2.1</b>	Variation 1:	Proline-Catalyzed Reaction of Ketones with <i>N</i> -(4-Methoxyphenyl)-Protected $\alpha$ -Imino Ethyl Glyoxylate .....	453
<b>40.1.1.5.2.2.2.2</b>	Variation 2:	5-(Pyrrolidin-2-yl)tetrazole-Catalyzed Reaction of Ketones with <i>N</i> -(4-Methoxyphenyl)-Protected Imines .....	454
<b>40.1.1.5.2.2.2.3</b>	Variation 3:	Reaction of Enolizable Aldehydes with <i>N</i> -(4-Methoxyphenyl)-Protected $\alpha$ -Imines .....	455
<b>40.1.1.5.2.2.3</b>	Method 3:	$\alpha$ -Amino Acids by <i>anti</i> -Selective Synthesis .....	456
<b>40.1.1.5.2.2.3.1</b>	Variation 1:	Reaction of Enolizable Aldehydes Catalyzed by a Chiral Amino Sulfonamide .....	456
<b>40.1.1.5.2.2.3.2</b>	Variation 2:	Reaction of Enolizable Aldehydes Catalyzed by a Chiral Pyrrolidine-Based Amino Sulfonamide .....	457
<b>40.1.1.5.2.2.3.3</b>	Variation 3:	Reaction of Enolizable Aldehydes Catalyzed by Amino Acid Derivatives .....	458
<b>40.1.1.5.2.2.3.4</b>	Variation 4:	<i>anti</i> -Mannich Reactions of Unmodified Ketones .....	459
<b>40.1.1.5.2.2.3.5</b>	Variation 5:	Synthesis of Optically Active Quaternary $\alpha$ -Amino Acid Derivatives .....	460
<b>40.1.1.5.2.2.4</b>	Method 4:	$\beta$ -Amino Acids by Indirect Mannich Reaction of Ketene Silyl Acetals with Protected Imines .....	461
<b>40.1.1.5.2.2.4.1</b>	Variation 1:	Chiral-Thiourea-Catalyzed Addition of Ketene Silyl Acetals to <i>N</i> -( <i>tert</i> -Butoxycarbonyl)aldimines .....	461
<b>40.1.1.5.2.2.4.2</b>	Variation 2:	Chiral Brønsted Acid Catalyzed Reaction of Aldimines with Ketene Silyl Acetals .....	462
<b>40.1.1.5.2.2.5</b>	Method 5:	$\beta$ -Amino Acids by Addition of CH-Acidic 1,3-Dicarbonyl Compounds to Protected Imines .....	464

<b>40.1.1.5.2.2.5.1</b>	Variation 1:	Enantioselective Addition of Malonate to <i>N</i> -( <i>tert</i> -Butoxy-carbonyl)-Protected Aromatic and Aliphatic Aldimines .....	464
<b>40.1.1.5.2.2.5.2</b>	Variation 2:	Addition of $\beta$ -Oxo Esters to Protected Imines Catalyzed by Cinchona Alkaloids .....	464
<b>40.1.1.5.2.2.5.3</b>	Variation 3:	Stereoselective Synthesis of $\alpha,\beta$ -Diamino Acids Using a Chiral Phase-Transfer Catalyst .....	465
<b>40.1.1.5.2.3</b>		Metal-Catalyzed Asymmetric Mannich Reaction .....	467
<b>40.1.1.5.2.3.1</b>	Method 1:	Synthesis Using Silyl Enol Ethers and Ketene Silyl Acetals as Nucleophiles .....	467
<b>40.1.1.5.2.3.1.1</b>	Variation 1:	Enantio- and Diastereoselective Synthesis of $\beta$ -Amino Carbonyl Compounds .....	468
<b>40.1.1.5.2.3.1.2</b>	Variation 2:	Enantio- and Diastereoselective Synthesis of $\beta$ -Amino Ketones in Water .....	469
<b>40.1.1.5.2.3.1.3</b>	Variation 3:	Enantioselective Synthesis of $\beta$ -Amino Esters .....	470
<b>40.1.1.5.2.3.2</b>	Method 2:	Synthesis of <i>anti</i> - or <i>syn</i> - $\beta$ -Amino- $\alpha$ -hydroxy Ketones .....	472
<b>40.1.1.5.2.3.2.1</b>	Variation 1:	Metal-1,1'-Binaphthalene-2,2'-diol Complexes as Catalyst ..	472
<b>40.1.1.5.2.3.2.2</b>	Variation 2:	Dinuclear Zinc Complexes as Catalyst .....	473
<b>40.1.1.5.3</b>		<b>Modification of Mannich Adducts</b>	
		J. Ipaktschi and M. R. Saidi	
<b>40.1.1.5.3</b>		<b>Modification of Mannich Adducts</b> .....	479
<b>40.1.1.5.3.1</b>		Modification of the Amino Group .....	479
<b>40.1.1.5.3.1.1</b>	Method 1:	Deprotection of the <i>N</i> -( <i>tert</i> -Butoxycarbonyl) Group .....	479
<b>40.1.1.5.3.1.2</b>	Method 2:	Deprotection of <i>N</i> -(4-Hydroxyphenyl), <i>N</i> -(4-Methoxyphenyl), and <i>N</i> -(2-Methoxyphenyl) Groups .....	480
<b>40.1.1.5.3.1.3</b>	Method 3:	Deprotection of <i>N</i> -(Diarylphosphoryl) Groups .....	481
<b>40.1.1.5.3.1.4</b>	Method 4:	Deprotection of <i>N</i> -(Arylsulfonyl) Groups .....	481
<b>40.1.1.5.3.1.5</b>	Method 5:	Deprotection of the <i>N</i> -[( <i>R</i> )-2-Hydroxy-1-phenylethyl] Group ..	482
<b>40.1.1.5.3.1.6</b>	Method 6:	Acylation Using Triphosgene .....	482
<b>40.1.1.5.3.1.7</b>	Method 7:	Guanidinylation and the Synthesis of Capreomycinidine .....	484
<b>40.1.1.5.3.1.8</b>	Method 8:	Synthesis of Enantioenriched Dihydropyrimidinones .....	485
<b>40.1.1.5.3.2</b>		Modification of the Carbonyl Group .....	486
<b>40.1.1.5.3.2.1</b>	Method 1:	Enantioselective Synthesis of $\beta^2$ -Amino Acid Derivatives ..	486
<b>40.1.1.5.3.2.2</b>	Method 2:	Enantioselective Synthesis of $\beta^{2,3}$ -Amino Acid Derivatives ..	488
<b>40.1.1.5.3.2.3</b>	Method 3:	Baeyer–Villiger Oxidation .....	489
<b>40.1.1.5.3.2.4</b>	Method 4:	Diastereoselective Reduction: Synthesis of (+)-Polyoxamic Acid .....	489
<b>40.1.1.5.3.2.5</b>	Method 5:	Synthesis of $\beta$ -Lactams .....	491
<b>40.1.1.5.3.2.6</b>	Method 6:	Palladium-Catalyzed Carbonylation: Synthesis of ( $\pm$ )-Gelsemine .....	492
<b>40.1.1.5.3.2.7</b>	Method 7:	Synthesis of Peptides: Synthesis of Azumamide A .....	493
<b>40.1.1.5.3.3</b>		Reduction of the Carbonyl Group and Imines .....	494
<b>40.1.1.5.3.3.1</b>	Method 1:	Enantioselective Synthesis of 1,3-Amino Alcohols: Synthesis of HPA-12 .....	495

<b>40.1.1.5.3.3.2</b>	Method 2: Enantioselective Synthesis of 1,3-Amino Alcohols: Synthesis of (–)-Sedamine .....	495
<b>40.1.1.5.3.3.3</b>	Method 3: Enantioselective Synthesis of 1,3-Diamines .....	497
<b>40.1.1.5.4</b>	<b>Substitution on the Amine Nitrogen</b>	
	S. A. Lawrence	
<b>40.1.1.5.4</b>	<b>Substitution on the Amine Nitrogen .....</b>	501
<b>40.1.1.5.4.1</b>	Dealkylation Reactions of Amines .....	501
<b>40.1.1.5.4.1.1</b>	Method 1: The von Braun Reaction with Cyanogen Bromide .....	501
<b>40.1.1.5.4.1.2</b>	Method 2: Dealkylation by Acylation .....	504
<b>40.1.1.5.4.1.3</b>	Method 3: Nitrosative Dealkylation Reactions .....	509
<b>40.1.1.5.4.1.4</b>	Method 4: Dealkylation by Transamination .....	509
<b>40.1.1.5.4.1.5</b>	Method 5: Acid-Mediated Dealkylation .....	511
<b>40.1.1.5.4.1.6</b>	Method 6: Photolytic Dealkylation .....	512
<b>40.1.1.5.4.1.7</b>	Method 7: Cleavage of the C–N Bond Using Selenols .....	512
