

## Catalytic Transformations via C—H Activation 2

	<b>Preface</b> .....	V
	<b>Abstracts</b> .....	IX
	<b>Table of Contents</b> .....	XVII
<b>2.1</b>	<b>C—C and C—X Bond Formation by Allylic C—H Activation</b> G. Liu and P. Chen .....	1
<b>2.2</b>	<b>C—C Bond Formation by Alkyl C—H Activation</b> O. Baudoin .....	37
<b>2.3</b>	<b>C—C Bond Formation Using Carbenes</b> X. Cui and X. P. Zhang .....	63
<b>2.4</b>	<b>C—C Bond Formation Using Radicals</b> W.-W. Chan and W.-Y. Yu .....	95
<b>2.5</b>	<b>C—C Bond Formation by Double C—H Activation</b> J.-B. Xia and S.-L. You .....	115
<b>2.6</b>	<b>C—C Bond Formation by C—H Carboxylation or Carbonylation</b> H. Zhang, C. Liu, and A. Lei .....	137
<b>2.7</b>	<b>C—Hal Bond Formation by Arene C—H Activation</b> M. S. Sanford and A. Cook .....	183
<b>2.8</b>	<b>C—N Bond Formation by Arene C—H Activation Using a Palladium Catalyst</b> P. Dauban and B. Darses .....	221
<b>2.9</b>	<b>C—N Bond Formation by C—H Functionalization via Metal-Catalyzed Nitrene Insertion</b> N. Mace Weldy and S. B. Blakey .....	249
<b>2.10</b>	<b>C—O Bond Formation by Arene C—H Activation via Biomimetic and Organocatalytic Oxidation</b> Y. Hitomi and K. Arakawa .....	287
<b>2.11</b>	<b>C—O Bond Formation by Arene C—H Activation via Metal-Catalyzed Oxidation</b> D.-D. Li and G.-W. Wang .....	315

2.12	<b>C–B Bond Formation by Arene C–H Activation</b> A. Ros, R. Fernández, and J. M. Lassaletta .....	405
	<b>Keyword Index</b> .....	447
	<b>Author Index</b> .....	475
	<b>Abbreviations</b> .....	489

## Table of Contents

<b>2.1</b>	<b>C—C and C—X Bond Formation by Allylic C—H Activation</b> G. Liu and P. Chen	
<hr/>		
<b>2.1</b>	<b>C—C and C—X Bond Formation by Allylic C—H Activation</b> .....	1
<b>2.1.1</b>	C—C Bond Formation by Allylic C—H Activation .....	3
<b>2.1.1.1</b>	Reaction Using a Palladium Catalyst .....	3
<b>2.1.1.2</b>	Reaction Using Rhodium and Ruthenium Catalysts .....	8
<b>2.1.1.3</b>	Reaction Using Copper, Iron, and Cobalt Catalysts .....	10
<b>2.1.2</b>	C—N Bond Formation by Allylic C—H Activation .....	12
<b>2.1.2.1</b>	Reaction Using a Palladium Catalyst .....	12
<b>2.1.2.2</b>	Reaction Using Rhodium and Ruthenium Catalysts .....	17
<b>2.1.2.3</b>	Reaction Using Copper and Iron Catalysts .....	21
<b>2.1.3</b>	C—O Bond Formation by Allylic C—H Activation .....	25
<b>2.1.3.1</b>	Reaction Using a Palladium Catalyst .....	25
<b>2.1.3.2</b>	Reaction Using Copper and Iron Catalysts .....	30
<b>2.1.4</b>	Other C—X Bonds Formed by Allylic C—H Activation .....	31
<b>2.2</b>	<b>C—C Bond Formation by Alkyl C—H Activation</b> O. Baudoin	
<hr/>		
<b>2.2</b>	<b>C—C Bond Formation by Alkyl C—H Activation</b> .....	37
<b>2.2.1</b>	Heteroatom-Directed C(sp <sup>3</sup> )—H Activation .....	37
<b>2.2.1.1</b>	Cross Coupling with Alkenes, Alkynes, and Carbon Monoxide .....	37
<b>2.2.1.2</b>	Cross Coupling with Organoboron Reagents .....	42
<b>2.2.1.3</b>	Cross Coupling with Diaryliodonium Salts and Organic Halides .....	45
<b>2.2.2</b>	Oxidative Addition Induced C(sp <sup>3</sup> )—H Activation/Intramolecular C—C Coupling	51
<b>2.2.2.1</b>	Palladium(0)-Catalyzed Synthesis of Polycyclic Systems .....	51
<b>2.2.2.2</b>	Asymmetric Reactions .....	56
<b>2.2.3</b>	Nondirected Intermolecular C(sp <sup>3</sup> )—H Arylation .....	59
<b>2.3</b>	<b>C—C Bond Formation Using Carbenes</b> X. Cui and X. P. Zhang	
<hr/>		
<b>2.3</b>	<b>C—C Bond Formation Using Carbenes</b> .....	63
<b>2.3.1</b>	Stereoselective Intramolecular Carbene C—H Insertion .....	64
<b>2.3.1.1</b>	Insertion into Secondary C—H Bonds .....	64

2.3.1.1.1	Insertion Using Alkyl Diazoacetates	64
2.3.1.1.2	Insertion Using Cycloalkyl Diazoacetates	65
2.3.1.1.3	Insertion into C—H Bonds Adjacent to Oxygen Atoms	66
2.3.1.1.4	Insertion into C—H Bonds Adjacent to Nitrogen Atoms	67
2.3.1.1.5	Insertion Using Aryldiazoacetates	68
2.3.1.1.6	Insertion Using Alkyldiazoacetates	69
2.3.1.1.7	Insertion Using Acceptor/Acceptor-Substituted Diazo Reagents	70
2.3.1.2	Insertion into Tertiary C—H Bonds	71
2.3.1.2.1	Insertion Using Aryldiazoacetates	72
2.3.1.2.2	Sequential Insertion Reactions	72
2.3.1.3	Insertion into Primary C—H Bonds	74
2.3.1.4	Insertion into C(sp <sup>2</sup> )—H Bonds	74
2.3.2	Stereoselective Intermolecular Carbene C—H Insertion	75
2.3.2.1	Insertion into Secondary C—H Bonds	76
2.3.2.1.1	Insertion into Cycloalkanes	76
2.3.2.1.2	Insertion into Cycloalkenes	77
2.3.2.1.3	Insertion into Cyclohexa-1,4-diene	78
2.3.2.1.4	Insertion into Tetrahydrofuran	80
2.3.2.1.5	Insertion into Silyl Ethers	82
2.3.2.1.6	Insertion into Cyclic Amines	83
2.3.2.1.7	Insertion into Benzylic C—H Bonds	84
2.3.2.2	Insertion into Tertiary C—H Bonds	84
2.3.2.3	Insertion into Primary C—H Bonds	86
2.3.2.3.1	Competitive Insertion between Primary and Secondary C—H Bonds	86
2.3.2.3.2	Competitive Insertion between Primary and Benzylic C—H Bonds	86
2.3.2.4	Insertion into C(sp <sup>2</sup> )—H Bonds	87
2.3.2.4.1	Insertion of Alkyldiazoacetates into Indoles	88
2.3.2.4.2	Insertion of Aryldiazoacetates into Indoles	89
2.3.3	Conclusions	90
2.4	<b>C—C Bond Formation Using Radicals</b> W.-W. Chan and W.-Y. Yu	
2.4	<b>C—C Bond Formation Using Radicals</b>	95
2.4.1	Palladium-Catalyzed <i>ortho</i> -Selective Oxidative Acylation of Arenes with Aldehydes	98
2.4.1.1	Acylation of Aryloximes with Aldehydes	98
2.4.1.2	Acylation of Anilides with Aldehydes	100

2.4.1.3	Acylation of <i>N</i> -Benzyltrifluoromethanesulfonamides with Aldehydes	101
2.4.1.4	Acylation of Aryldiazenes with Aldehydes	103
2.4.2	Transition-Metal-Free Direct Arylation of Arenes with Aryl Halides	105
2.4.3	Direct Functionalization of <i>N</i> -Heterocycles (Minisci-Type Radical Coupling)	106
2.4.3.1	Arylation of <i>N</i> -Heterocycles with Boronic Acids	106
2.4.3.2	Alkylation of <i>N</i> -Heterocycles with Zinc(II) Sulfinates	108
2.4.3.3	Acylation of Isoquinolines and Pyridines with Aldehydes	111
<b>2.5</b>	<b>C—C Bond Formation by Double C—H Activation</b> J.-B. Xia and S.-L. You	
<b>2.5</b>	<b>C—C Bond Formation by Double C—H Activation</b>	115
2.5.1	Oxidative Homocoupling	116
2.5.1.1	Palladium-Catalyzed Homocoupling of Benzene	116
2.5.1.2	Palladium-Catalyzed Homocoupling of Thiophenes	117
2.5.1.3	Palladium-Catalyzed Homocoupling of Indolizines	117
2.5.1.4	Palladium-Catalyzed Directed Homocoupling of 2-Arylpyridines	118
2.5.2	Oxidative Cross Coupling	119
2.5.2.1	Direct Coupling	119
2.5.2.1.1	Palladium-Catalyzed Coupling of Hetarenes with Arenes	119
2.5.2.1.2	Palladium-Catalyzed Coupling of Polyfluoroarenes with Arenes	121
2.5.2.1.3	Transition-Metal-Catalyzed Heterocoupling of Hetarenes	122
2.5.2.2	Directed Coupling	125
2.5.2.2.1	Palladium-Catalyzed Coupling of Benzo[ <i>h</i> ]quinoline with Arenes	125
2.5.2.2.2	Palladium-Catalyzed Coupling of 2-Ferrocenyl-4,5-dihydrooxazoles with Arenes	126
2.5.2.2.3	Palladium-Catalyzed Coupling of Anilides with Arenes	127
2.5.2.2.4	Palladium-Catalyzed Coupling of <i>O</i> -Phenyl Carbamates with Arenes	127
2.5.2.2.5	Palladium-Catalyzed Coupling of Benzamides with Arenes	128
2.5.2.2.6	Rhodium-Catalyzed Coupling of Benzamides with Arenes	129
2.5.2.2.7	Transition-Metal-Mediated Coupling of 2-Arylpyridines with Hetarenes	131
2.5.3	Intramolecular Oxidative Coupling	132
2.5.3.1	Palladium-Catalyzed Coupling of Arenes	132
2.5.3.2	Palladium-Catalyzed Coupling of Arenes with Hetarenes	133

<b>2.6</b>	<b>C—C Bond Formation by C—H Carboxylation or Carbonylation</b> H. Zhang, C. Liu, and A. Lei	
<b>2.6</b>	<b>C—C Bond Formation by C—H Carboxylation or Carbonylation</b> .....	137
<b>2.6.1</b>	C—C Bond Formation by C—H Carboxylation .....	138
<b>2.6.1.1</b>	C—H Carboxylation Using Carbon Monoxide .....	138
<b>2.6.1.1.1</b>	C(sp <sup>2</sup> )—H Carboxylation without Directing Groups .....	138
<b>2.6.1.1.2</b>	C(sp <sup>2</sup> )—H Carboxylation Assisted by Directing Groups .....	139
<b>2.6.1.1.2.1</b>	Carboxy Directing Groups .....	139
<b>2.6.1.1.2.2</b>	Acylamino Directing Groups .....	141
<b>2.6.1.1.2.3</b>	Sulfonamide Directing Groups .....	143
<b>2.6.1.2</b>	C—H Carboxylation Using Carbon Dioxide .....	144
<b>2.6.1.2.1</b>	C(sp <sup>2</sup> )—H Carboxylation without Directing Groups .....	144
<b>2.6.1.2.1.1</b>	Synthesis of Carboxylic Acids .....	144
<b>2.6.1.2.1.2</b>	Synthesis of Esters .....	146
<b>2.6.1.2.2</b>	C(sp <sup>2</sup> )—H Carboxylation Assisted by Directing Groups .....	148
<b>2.6.1.2.2.1</b>	N-Hetarene Directing Groups .....	148
<b>2.6.2</b>	C—C Bond Formation by C—H Carbonylation .....	149
<b>2.6.2.1</b>	C(sp <sup>2</sup> )—H Carbonylation .....	150
<b>2.6.2.1.1</b>	Intramolecular C(sp <sup>2</sup> )—H Carbonylation without Directing Groups .....	150
<b>2.6.2.1.1.1</b>	Synthesis of Xanthenes .....	150
<b>2.6.2.1.2</b>	Intramolecular C(sp <sup>2</sup> )—H Carbonylation Assisted by Directing Groups .....	151
<b>2.6.2.1.2.1</b>	Aminoalkyl Directing Groups .....	151
<b>2.6.2.1.2.2</b>	Aminoaryl Directing Groups .....	155
<b>2.6.2.1.2.3</b>	Hydroxyalkyl Directing Groups .....	158
<b>2.6.2.1.2.4</b>	<i>N</i> -(2-Pyridylmethyl)amido Directing Group .....	159
<b>2.6.2.1.2.5</b>	<i>N</i> -Alkoxy- and <i>N</i> -Alkylamido Directing Groups .....	162
<b>2.6.2.1.2.6</b>	Alkylamino Directing Groups .....	164
<b>2.6.2.1.2.7</b>	Amidine Directing Groups .....	165
<b>2.6.2.1.2.8</b>	Sulfonamide Directing Groups .....	166
<b>2.6.2.1.3</b>	Intermolecular C(sp <sup>2</sup> )—H Carbonylation without Directing Groups .....	167
<b>2.6.2.1.3.1</b>	Synthesis of Esters .....	167
<b>2.6.2.1.4</b>	Intermolecular C(sp <sup>2</sup> )—H Carbonylation Assisted by Directing Groups .....	172
<b>2.6.2.1.4.1</b>	N-Hetarene Directing Groups .....	172
<b>2.6.2.1.4.2</b>	Urea Directing Groups .....	173
<b>2.6.2.1.4.3</b>	(Dimethylamino)methyl Directing Group .....	174
<b>2.6.2.2</b>	C(sp <sup>3</sup> )—H Carbonylation .....	176

2.6.2.2.1	Intramolecular C(sp <sup>3</sup> )–H Carbonylation Assisted by Directing Groups	176
2.6.2.2.1.1	<i>N</i> -(Aryl)amido Directing Groups	176
2.6.2.2.1.2	<i>N</i> -(2-Pyridylmethyl)amido Directing Groups	177
2.6.2.2.2	Intermolecular C(sp <sup>3</sup> )–H Carbonylation without Directing Groups	179
2.6.2.2.2.1	Synthesis of Esters	179
<b>2.7</b>	<b>C–Hal Bond Formation by Arene C–H Activation</b> M. S. Sanford and A. Cook	
<hr/>		
<b>2.7</b>	<b>C–Hal Bond Formation by Arene C–H Activation</b>	183
2.7.1	C(sp <sup>2</sup> )–H Fluorination	183
2.7.1.1	Ligand-Directed Fluorination	183
2.7.2	C(sp <sup>2</sup> )–H Chlorination	190
2.7.2.1	Ligand-Directed Chlorination	190
2.7.2.1.1	Chlorination with <i>N</i> -Chlorosuccinimide	190
2.7.2.1.2	Chlorination with Other Chlorine-Containing Oxidants	192
2.7.2.1.3	Chlorination with an Oxidant and a Nucleophilic Chloride Source	195
2.7.3	C(sp <sup>2</sup> )–H Bromination	199
2.7.3.1	Ligand-Directed Bromination	199
2.7.3.1.1	Bromination with <i>N</i> -Bromosuccinimide	199
2.7.3.1.2	Bromination with an Oxidant and a Nucleophilic Bromide Source	204
2.7.3.2	Non-Directed Bromination	207
2.7.3.2.1	Bromination with <i>N</i> -Bromosuccinimide	207
2.7.4	C(sp <sup>2</sup> )–H Iodination	209
2.7.4.1	Ligand-Directed Iodination	209
2.7.4.1.1	Iodination with <i>N</i> -Iodosuccinimide	209
2.7.4.1.2	Iodination with Acetyl Hypiodite	212
2.7.4.1.3	Iodination with Molecular Iodine	216
2.7.4.2	Non-Directed Iodination	217
2.7.4.2.1	Iodination with <i>N</i> -Iodosuccinimide	217
<b>2.8</b>	<b>C–N Bond Formation by Arene C–H Activation Using a Palladium Catalyst</b> P. Dauban and B. Darses	
<hr/>		
<b>2.8</b>	<b>C–N Bond Formation by Arene C–H Activation Using a Palladium Catalyst</b>	221
2.8.1	Intramolecular C–N Bond Formation	222
2.8.1.1	Synthesis of Five-Membered Rings	222
2.8.1.1.1	Preparation of Carbazoles	222

2.8.1.1.2	Preparation of Oxindoles .....	226
2.8.1.1.3	Preparation of Dihydroindoles .....	228
2.8.1.1.4	Preparation of Indoles .....	231
2.8.1.1.5	Preparation of Benzimidazoles .....	233
2.8.1.1.6	Preparation of Benzotriazoles .....	235
2.8.1.2	Synthesis of Six-Membered Rings .....	236
2.8.1.2.1	Preparation of Quinolinones .....	236
2.8.1.2.2	Preparation of Phenanthridinones .....	239
2.8.2	Intermolecular C—N Bond Formation .....	240
2.8.2.1	Synthesis by <i>ortho</i> -Amidation .....	240
2.8.2.1.1	Reaction of Aromatic Oximes .....	240
2.8.2.1.2	Reaction of Aromatic Ketones .....	241
2.8.2.1.3	Reaction of Anilides .....	242
2.8.2.1.4	Reaction of Benzoic Acids .....	245
2.8.2.1.5	Reaction of Amides .....	246
2.9	<b>C—N Bond Formation by C—H Functionalization via Metal-Catalyzed Nitrene Insertion</b> N. Mace Weldy and S. B. Blakey	
2.9	<b>C—N Bond Formation by C—H Functionalization via Metal-Catalyzed Nitrene Insertion</b> .....	249
2.9.1	Amination of C(sp <sup>3</sup> )—H Bonds .....	250
2.9.1.1	Intramolecular Amination Reactions .....	250
2.9.1.1.1	Amination with Carbamates To Give 1,2-Amino Alcohol Derivatives .....	250
2.9.1.1.2	Propargylic Amination with Carbamates To Give 1,2-Amino Alcohol Derivatives .....	251
2.9.1.1.3	Amination with Sulfamates To Give 1,3-Amino Alcohol Derivatives .....	253
2.9.1.1.4	Enantioselective Amination with Sulfamate Esters To Give 1,3-Amino Alcohol Derivatives .....	254
2.9.1.1.5	Benzylic Amination with Phosphoryl Azides To Give 1,3-Amino Alcohol Derivatives .....	256
2.9.1.1.6	Amination with Ureas and Guanidines To Give 1,2-Diamine Derivatives .....	258
2.9.1.1.7	Amination with Hydroxylamine-Based Sulfamate Esters To Give 1,2-Diamine Derivatives .....	259
2.9.1.1.8	Amination with <i>N</i> -Alkyl- <i>N</i> -( <i>tert</i> -butoxycarbonyl)sulfamides To Give 1,3-Diamine Derivatives .....	261
2.9.1.1.9	Amination with Sulfamoyl Azides To Give 1,3-Diamine Derivatives .....	263
2.9.1.1.10	Benzylic Amination with Sulfonyl Azides To Give Sultams .....	264

2.9.1.1.11	Benzylic Amination with Aryl Azides To Give 2-Aryldihydroindoles	265
2.9.1.1.12	Alkyl Amination with Aryl Azides To Give Functionalized Dihydroindoles	266
2.9.1.1.13	Aliphatic Amination with Alkyl Azides To Give Pyrrolidines	267
2.9.1.2	Intermolecular Amination Reactions	269
2.9.1.2.1	Benzylic and Tertiary C—H Amination with 2,2,2-Trichloroethyl Sulfamate and 2,6-Difluorophenyl Sulfamate	269
2.9.1.2.2	Stereoselective Amination with <i>N</i> -(Mesyloxy)- and <i>N</i> -(Tosyloxy)carbamates	272
2.9.1.2.3	Directed Primary Amidation with Sulfonyl Azides	274
2.9.1.2.4	Enantioselective Benzylic Amination with 4-Nitrobenzenesulfonamide	275
2.9.1.2.5	Enantioselective Benzylic and Allylic Amination with 2-(Trimethylsilyl)ethanesulfonyl Azide	276
2.9.2	Amination of C(sp <sup>2</sup> )—H Bonds	278
2.9.2.1	Intramolecular Amination Reactions	278
2.9.2.1.1	Aryl Amination with Vinyl Azides To Give Substituted Indoles	278
2.9.2.1.2	Vinyl Amination with Aryl Azides To Give Indoles	279
2.9.2.1.3	Amination with Biaryl Azides To Give Carbazoles	279
2.9.2.2	Intermolecular Amination Reactions	280
2.9.2.2.1	Directed Aryl Amidation with Azides	280
2.9.2.2.2	Directed Amidation of Alkenes with Acyl Azides	284
2.10	<b>C—O Bond Formation by Arene C—H Activation via Biomimetic and Organocatalytic Oxidation</b> Y. Hitomi and K. Arakawa	
2.10	<b>C—O Bond Formation by Arene C—H Activation via Biomimetic and Organocatalytic Oxidation</b>	287
2.10.1	Biomimetic Oxidation	287
2.10.1.1	Catalysis by Porphyrin Complexes	288
2.10.1.1.1	Reaction with Iron- and Manganese-Porphyrins	289
2.10.1.1.2	Reaction with Ruthenium-Porphyrins	295
2.10.1.2	Catalysis by Non-heme Iron Complexes	297
2.10.1.3	Catalysis by Copper Complexes	307
2.10.2	Organocatalytic Oxidation	309
2.10.2.1	Reaction with Phthaloyl Peroxide	309

<b>2.11</b>	<b>C—O Bond Formation by Arene C—H Activation via Metal-Catalyzed Oxidation</b> D.-D. Li and G.-W. Wang	
<hr/>		
<b>2.11</b>	<b>C—O Bond Formation by Arene C—H Activation via Metal-Catalyzed Oxidation</b>	315
<b>2.11.1</b>	Palladium-Catalyzed C—O Bond Formation	315
<b>2.11.1.1</b>	Intermolecular C—O Bond Formation	315
<b>2.11.1.1.1</b>	Acyloxylation of Arenes	316
<b>2.11.1.1.2</b>	Alkoxylation of Arenes	344
<b>2.11.1.1.3</b>	Hydroxylation of Arenes	355
<b>2.11.1.2</b>	Intramolecular C—O Bond Formation	365
<b>2.11.2</b>	Copper-Catalyzed C—O Bond Formation	374
<b>2.11.2.1</b>	Intermolecular C—O Bond Formation	375
<b>2.11.2.2</b>	Intramolecular C—O Bond Formation	388
<b>2.11.3</b>	Ruthenium-Catalyzed C—O Bond Formation	391
<b>2.11.3.1</b>	Intermolecular C—O Bond Formation	391
<b>2.11.4</b>	Conclusions	400
