

Table of Contents

Volume 2: Compounds of Groups 7–3 (Mn^{...}, Cr^{...}, V^{...}, Ti^{...}, Sc^{...}, La^{...}, Ac^{...})

2.7	Product Class 7: Carbonyl Complexes of Chromium, Molybdenum, and Tungsten with σ-Bonded Ligands	
2.7.10	Carbonyl Complexes of Chromium, Molybdenum, and Tungsten with σ-Bonded Ligands	2014
	E. Aguilar and L. A. López	
2.7.10	Carbonyl Complexes of Chromium, Molybdenum, and Tungsten with σ-Bonded Ligands	1
2.7.10.1	Metal–Carbene Complexes	1
2.7.10.1.1	Synthesis of Metal–Carbene Complexes	2
2.7.10.1.1.1	Method 1: Fischer Method	2
2.7.10.1.1.2	Method 2: Synthesis from Hexacarbonylmethyl(0) Complexes by Photochemical Cleavage of One Carbonyl Ligand	2
2.7.10.1.1.3	Method 3: Synthesis from Acidic Carbene Complexes: Preparation of Alkenylcarbene Complexes by Aldol Condensation	4
2.7.10.1.1.4	Method 4: Synthesis from Ordinary Alkoxy-carbene Complexes: Preparation of Enantiopure Alkynylcarbene Complexes via Non-Heteroatom-Stabilized Carbene Complexes	5
2.7.10.1.2	Applications of Metal–Carbene Complexes in Organic Synthesis	7
2.7.10.1.2.1	Release of the Organic Moiety from Fischer Carbene Complexes	7
2.7.10.1.2.1.1	Method 1: Nonoxidative Release of the Organic Moiety from Carbene Complexes	8
2.7.10.1.2.1.2	Method 2: Oxidation of Carbene Complexes	9
2.7.10.1.2.2	Reactions of Alkyl- and Arylcarbene Complexes	9
2.7.10.1.2.2.1	Method 1: Synthesis of Acyclic Compounds	9
2.7.10.1.2.2.1.1	Variation 1: Synthesis of Dipeptides or Carboxylic Esters by Addition of Nucleophiles to Photochemically Generated Ketene Intermediates	9
2.7.10.1.2.2.1.2	Variation 2: Synthesis of 2-Acyl Enol Ethers and β -Oxo Esters	11
2.7.10.1.2.2.2	Method 2: Synthesis of Three-Membered Carbocycles	14
2.7.10.1.2.2.3	Method 3: Synthesis of Four-Membered Carbocycles: Synthesis of Cyclobutanones by [2 + 2] Cycloaddition to Photochemically Generated Ketene Intermediates	16
2.7.10.1.2.2.4	Method 4: Synthesis of Five-Membered Carbocycles	17
2.7.10.1.2.2.4.1	Variation 1: Synthesis of Cyclopentadienes via [2 + 2 + 1]-Cycloaddition Reaction	17

2.7.10.1.2.2.4.2	Variation 2:	Synthesis of Cyclopentenones by Reaction of a Chromium–Cyclopropylcarbene Complex with Alkynes	18
2.7.10.1.2.2.4.3	Variation 3:	Synthesis of Cyclopentanols	21
2.7.10.1.2.2.5	Method 5:	Synthesis of Six-Membered Carbocycles	23
2.7.10.1.2.2.5.1	Variation 1:	Synthesis of Cyclohexanediols	23
2.7.10.1.2.2.5.2	Variation 2:	Synthesis of Naphthalene Derivatives by Isoindole Cyclization, Diels–Alder Cycloaddition, and Related Processes	25
2.7.10.1.2.2.5.3	Variation 3:	Synthesis of 4-Hydroxycyclohex-2-enones	26
2.7.10.1.2.2.6	Method 6:	Synthesis of Seven-Membered Carbocycles	27
2.7.10.1.2.2.6.1	Variation 1:	Synthesis of Cycloheptadienones by a Formal [4 + 2 + 1]-Cycloaddition Reaction of a Tungsten (or Molybdenum) Cyclopropylcarbene Complex with Alkynes	27
2.7.10.1.2.2.7	Method 7:	Synthesis of Heterocycles	30
2.7.10.1.2.2.7.1	Variation 1:	Synthesis of Lactams or Lactones by [2 + 2] Cycloaddition to Photochemically Generated Ketene Intermediates	30
2.7.10.1.2.2.7.2	Variation 2:	Synthesis of Lactones by Reaction with Alkynyl Alcohols or Protected Alkynyl Alcohols	31
2.7.10.1.2.2.7.3	Variation 3:	Synthesis of Five-Membered Heterocycles by a Formal Three-Component [2 + 2 + 1]-Cycloaddition Reaction with Alkynyllithium Reagents	33
2.7.10.1.2.2.7.4	Variation 4:	Synthesis of Five-Membered Heterocycles by Benzo[c]furan Cyclization and Related Processes	35
2.7.10.1.2.2.7.5	Variation 5:	Synthesis of Fused Bicyclic But-2-enolides	36
2.7.10.1.2.3		Reactions of Alkenylcarbene Complexes	40
2.7.10.1.2.3.1	Method 1:	Synthesis of Acyclic Compounds	40
2.7.10.1.2.3.2	Method 2:	Synthesis of Three-Membered Carbocycles	44
2.7.10.1.2.3.2.1	Variation 1:	Cyclopropanation of Nonactivated Alkenes	44
2.7.10.1.2.3.2.2	Variation 2:	Synthesis of Cyclopropane Derivatives from Halomethylithium and Related Systems	45
2.7.10.1.2.3.3	Method 3:	Synthesis of Five-Membered Carbocycles	48
2.7.10.1.2.3.3.1	Variation 1:	Cyclopentadienes, Cyclopentenones, and Indenes from Alkynes via [3 + 2]-Cyclization Reactions	48
2.7.10.1.2.3.3.2	Variation 2:	Cyclopentanone and Cyclopentenone Derivatives from Enamines and Enolates via [3 + 2]-Cyclization Reactions	52
2.7.10.1.2.3.3.3	Variation 3:	2- and 3-Alkylidenecyclopentanone Derivatives from Allenes via [3 + 2]-Cyclization Reactions	54
2.7.10.1.2.3.3.4	Variation 4:	Cyclopentene Derivatives from 1,3-Dienes	58
2.7.10.1.2.3.4	Method 4:	Synthesis of Six-Membered Carbocycles	60
2.7.10.1.2.3.4.1	Variation 1:	Phenols and Naphthols from Alkynes via [3 + 2 + 1]-Cyclization Reactions	60
2.7.10.1.2.3.4.2	Variation 2:	Cyclohexene Derivatives via [4 + 2]-Cyclization Reactions	64
2.7.10.1.2.3.4.3	Variation 3:	Indenes from Fulvenes via [6 + 3]-Cyclization Reactions	66
2.7.10.1.2.3.5	Method 5:	Synthesis of Seven-Membered Carbocycles	67
2.7.10.1.2.3.5.1	Variation 1:	Cycloheptanone Derivatives from Dienes and Dienamines via Sequential [2 + 1] Cyclization/[3,3]-Sigmatropic Rearrangement	67
2.7.10.1.2.3.5.2	Variation 2:	Cycloheptenones from Enolates Derived from α,β -Unsaturated Carbonyl Compounds	69

2.7.10.1.2.3.5.3	Variation 3:	Cycloheptatriene Derivatives from Terminal Alkynes via a Nickel(0)-Mediated [3 + 2 + 2]-Cyclization Reaction	70
2.7.10.1.2.3.5.4	Variation 4:	1,2- and 1,3-Dialkylidenecycloheptanes from Allenes via [3 + 2 + 2]-Cyclization Reactions	70
2.7.10.1.2.3.6	Method 6:	Synthesis of Nitrogen Heterocycles	74
2.7.10.1.2.3.6.1	Variation 1:	Pyrazole and Pyrrole Derivatives via 1,3-Dipolar Cycloadditions	74
2.7.10.1.2.3.6.2	Variation 2:	Pyrrolidine Derivatives via Conjugate Addition of Iminoenolates Followed by Ring Closure	76
2.7.10.1.2.3.6.3	Variation 3:	Synthesis of Dihydropyrrole Derivatives from Simple Imines via [3 + 2]-Cyclization Reactions	77
2.7.10.1.2.3.6.4	Variation 4:	Synthesis of Tetrahydro-1-azaazulene and Cyclohepta[<i>b</i>]pyridinone Derivatives via [8 + 2] and [8 + 3] Cyclization with 8-Azaheptafulvenes	79
2.7.10.1.2.3.6.5	Variation 5:	Synthesis of Dihydroimidazo[1,2- <i>a</i>]pyridine Derivatives via [6 + 3] Cyclization of Diazafulvenes	81
2.7.10.1.2.3.6.6	Variation 6:	Synthesis of Azepine Derivatives from 1- and 2-Azadienes via [4 + 3] Cyclization	82
2.7.10.1.2.3.7	Method 7:	Synthesis of Oxygen Heterocycles	84
2.7.10.1.2.3.7.1	Variation 1:	Synthesis of Fused Lactones from Alkynyl Ketones via a Von Halban–White Double Cyclization	84
2.7.10.1.2.3.7.2	Variation 2:	Synthesis of Dihydrofuran Derivatives via a [2 + 1]-Cyclization/Ring-Enlargement Sequence	85
2.7.10.1.2.3.7.3	Variation 3:	Synthesis of Cyclopenta[<i>b</i>]pyrans from β -Amino- or β -Alkoxyalkenylcarbenes and Alkynes	86
2.7.10.1.2.3.7.4	Variation 4:	Synthesis of Dihydrobenzopyran-2-ones by [3 + 2 + 1] Benzannulation	87
2.7.10.1.2.3.7.5	Variation 5:	Synthesis of Both Rings of Benzopyrans via a Benzannulation/ <i>o</i> -Quinomethane Formation/Electrocyclization Cascade	88
2.7.10.1.2.3.7.6	Variation 6:	Synthesis of N-Heterocyclic Furan-Bridged Ten-Membered Rings	89
2.7.10.1.2.4		Reactions of Alkynylcarbene Complexes	90
2.7.10.1.2.4.1	Method 1:	Synthesis of Acyclic Compounds	90
2.7.10.1.2.4.1.1	Variation 1:	Synthesis of β -Substituted Alkenylcarbene Complexes by Nucleophilic Addition	90
2.7.10.1.2.4.1.2	Variation 2:	Synthesis of Push–Pull Dienyne	91
2.7.10.1.2.4.2	Method 2:	Synthesis of Alkynylcyclopropanes	91
2.7.10.1.2.4.3	Method 3:	Synthesis of Cyclobutenes	92
2.7.10.1.2.4.4	Method 4:	Synthesis of Five-Membered Carbocycles	93
2.7.10.1.2.4.4.1	Variation 1:	Synthesis of Cyclopentenoids (Cyclopentenones and Cyclopentadienes)	93
2.7.10.1.2.4.4.2	Variation 2:	Synthesis of Highly Functionalized Polycarbocycles by a [2 + 2 + 1]/[2 + 1] Tandem Reaction Sequence	99
2.7.10.1.2.4.5	Method 5:	Synthesis of Six-Membered Carbocycles	101
2.7.10.1.2.4.5.1	Variation 1:	Synthesis of Six-Membered Carbocycles by Diels–Alder Reactions and by [4 + 2]-Cycloaddition/Annulation Reactions	101
2.7.10.1.2.4.5.2	Variation 2:	Synthesis of Polycarbocycles by [2 + 2]-Cycloaddition/Benzannulation Reactions	104

2.7.10.1.2.4.6	Method 6:	Synthesis of Seven-Membered Carbocycles	106
2.7.10.1.2.4.6.1	Variation 1:	Synthesis of Cycloheptadienones by Reaction with Fulvenes	106
2.7.10.1.2.4.6.2	Variation 2:	Synthesis of Highly Functionalized Seven-Membered Benzo-carbocycles	107
2.7.10.1.2.4.7	Method 7:	Synthesis of Eight-Membered Carbocycles	108
2.7.10.1.2.4.8	Method 8:	Synthesis of Five-Membered Nitrogen-Heterocycles	109
2.7.10.1.2.4.8.1	Variation 1:	Synthesis of Five-Membered Nitrogen-Heterocycles by [3 + 2] Cycloaddition	109
2.7.10.1.2.4.8.2	Variation 2:	Synthesis of Polycyclic Imidazole, Pyrrole, and Indole Derivatives by Reaction with Azafulvenes	111
2.7.10.1.2.4.9	Method 9:	Synthesis of Six-Membered Nitrogen-Heterocycles	113
2.7.10.1.2.4.9.1	Variation 1:	Synthesis of Six-Membered Nitrogenated Heterocycles by Reaction with Azadienes	113
2.7.10.1.2.4.9.2	Variation 2:	Synthesis of 2-Aza-bicyclo[3.1.0]hexanes (2,3-Homopyrroles)	115
2.7.10.1.2.4.9.3	Variation 3:	Synthesis of Quinoline Derivatives by a [1,5]-Hydride Transfer/Cyclization Sequence	116
2.7.10.1.2.4.10	Method 10:	Synthesis of Seven-Membered Nitrogen-Heterocycles	119
2.7.10.1.2.4.10.1	Variation 1:	Synthesis of Azepine Derivatives	119
2.7.10.1.2.4.10.2	Variation 2:	Synthesis of Pyrrolodiazepines	120
2.7.10.1.2.5	Reactions of Nonstabilized Carbene Complexes		120
2.7.10.1.2.5.1	Method 1:	Synthesis of Dienynes and Dienediynes	121
2.7.10.1.2.5.2	Method 2:	Synthesis of Polyalkynylethenes via Carbene Dimerization	123
2.7.10.1.2.5.3	Method 3:	Synthesis of Alkynylcyclopropane Derivatives	127
2.7.10.1.2.5.4	Method 4:	Synthesis of Benzofurans from Furan-2-carbaldehyde Imines	128
2.7.10.1.2.5.5	Method 5:	Synthesis of Dihydroazetes and Subsequent Transformations	129

2.8

Product Class 8: Organometallic Complexes of Vanadium

2.8.10

Organometallic Complexes of Vanadium

2014

O. S. Shneider and A. M. Szpilman

2.8.10

Organometallic Complexes of Vanadium

139

2.8.10.1

Vanadium–Arene Complexes

139

2.8.10.1.1

Synthesis of Vanadium–Arene Complexes

139

2.8.10.1.1.1

Method 1: Synthesis of Vanadium Pyrrolide Complexes

139

2.8.10.1.1.2

Method 2: Synthesis of a Vanadium Dimer with Two Bridging π -Systems

140

2.8.10.1.1.3

Method 3: Synthesis of Complexes with *ansa* Bridging Positions

142

2.8.10.1.1.4

Method 4: Synthesis of Radical Trovacene Complexes

143

2.8.10.2

Vanadium–Cyclopentadienyl and Substituted Cyclopentadienyl Complexes

144

2.8.10.2.1

Synthesis of Vanadium–Cyclopentadienyl and Substituted Cyclopentadienyl Complexes

144

2.8.10.2.1.1

Method 1: Synthesis of Bis(η^5 -Cyclopentadienyl)vanadium(II) and Ring-Substituted Derivatives

144

2.8.10.2.1.2

Method 2: Synthesis of (η^5 -Cyclopentadienyl)vanadium Halides

145

2.8.10.2.1.3

Method 3: Synthesis of Bimetallic Vanadocenes

146

2014

Updated Section

2014

Completely Revised Contributions

New

New Contributions

2.8.10.2.1.4	Method 4:	Synthesis of (η^5 -Cyclopentadienyl)vanadium Complexes Linked to an Additional Metal	147
2.8.10.2.1.5	Method 5:	Synthesis of (η^5 -Cyclopentadienyl)vanadium Complexes Linked to Metalloids	148
2.8.10.2.1.5.1	Variation 1:	Synthesis of Vanadium–Borate Complexes	148
2.8.10.2.1.5.2	Variation 2:	Synthesis of Vanadium–Silyl Complexes	148
2.8.10.2.1.6	Method 6:	Synthesis of (η^5 -Cyclopentadienyl)vanadium Complexes Linked to a Nonmetal	149
2.8.10.2.1.7	Method 7:	Synthesis of (η^5 -Cyclopentadienyl)vanadium Complexes Linked to Organic Ligands	150
2.8.10.2.1.7.1	Variation 1:	Synthesis of Vanadocene Carboxylic Acid Complexes	150
2.8.10.2.1.7.2	Variation 2:	Synthesis of Vanadocene(IV) Pseudohalide Complexes	151
2.8.10.3		Vanadium–Alkene, Vanadium–Alkyne, and Vanadium–Alkylidyne Complexes	152
2.8.10.3.1		Synthesis of Vanadium–Alkene, Vanadium–Alkyne, and Vanadium–Alkylidyne Complexes	153
2.8.10.3.1.1	Method 1:	Synthesis of Vanadium–Alkylidyne σ -Complexes	153
2.8.10.3.1.2	Method 2:	Synthesis of an Alkyne(cyclopentadienyl)vanadium(I)–Dini- trogen Complex	154
2.8.10.4		Vanadium–Carbene Complexes	154
2.8.10.4.1		Synthesis of Vanadium–Carbene Complexes	154
2.8.10.4.1.1	Method 1:	Synthesis of Schrock- and Fischer-Type Carbene Complexes	154
2.8.10.4.1.1.1	Variation 1:	Synthesis of a Transient Vanadium(III)–Neopentylidene Complex	155
2.8.10.4.1.2	Method 2:	Synthesis of N-Heterocyclic Carbene Complexes	156
2.8.10.4.1.2.1	Variation 1:	Synthesis of Monocarbene Vanadium Complexes	156
2.8.10.4.1.2.2	Variation 2:	Synthesis of Vanadium–Dicarbene Complexes	158
2.8.10.4.1.2.3	Variation 3:	Synthesis of Vanadium Tetracarbene Complexes	159
2.8.10.5		Vanadium– σ -Alkyl and σ -Aryl Complexes	159
2.8.10.5.1		Synthesis of Vanadium– σ -Alkyl and σ -Aryl Complexes	160
2.8.10.5.1.1	Method 1:	Synthesis of σ -Bonded Organovanadium Complexes with Or- ganolithium or Organomagnesium Reagents	160
2.8.10.5.1.1.1	Variation 1:	Synthesis of Homoleptic Arylvanadate(III) Compounds	160
2.8.10.5.1.1.2	Variation 2:	Synthesis of Non-homoleptic Complexes	161
2.8.10.5.1.2	Method 2:	Synthesis of σ -Bonded Organovanadium Complexes through Transmetalation	162
2.8.10.5.1.2.1	Variation 1:	Synthesis of NCN-Pincer Complexes of Vanadium	162
2.8.10.5.1.3	Method 3:	Synthesis of σ -Bonded Organovanadium Complexes through Ligand Exchange	163
2.8.10.5.1.4	Method 4:	Synthesis of σ -Bonded Organovanadium Complexes with Alkyl Halides	164
2.8.10.5.2		Applications of Vanadium– σ -Alkyl and σ -Aryl Complexes in Organic Synthesis	165
2.8.10.6		Vanadium–Isocyanide Complexes	165
2.8.10.6.1		Synthesis of Vanadium–Isocyanide Complexes	165

2.8.10.6.1.1	Method 1: Formation of Di- and Tricyanovanadate(III) Complexes by Ligand Exchange	165
2.8.10.7	Hyridovanadium Complexes	166
2.8.10.7.1	Synthesis of Hyridovanadium Complexes	167
2.8.10.7.1.1	Method 1: Synthesis of Bis(η^5 -cyclopentadienyl)(μ -hydrido)[tris(pentafluorophenyl)borane]vanadium(III)	167
2.8.10.7.2	Applications of Hyridovanadium Complexes in Organic Synthesis	167
2.8.10.7.2.1	Method 1: Radical Cyclization Initiated by a Hyridovanadium Complex	167

Volume 3: Compounds of Groups 12 and 11 (Zn, Cd, Hg, Cu, Ag, Au)

3.4	Product Class 4: Organometallic Complexes of Copper	
3.4.8	Organometallic Complexes of Copper	2014
	B. H. Lipshutz and S. Ghorai	
3.4.8	Organometallic Complexes of Copper	173
3.4.8.1	Asymmetric Copper Hydride Catalyzed Transformations	173
3.4.8.1.1	Asymmetric 1,2-Hydrosilylations	178
3.4.8.1.1.1	Method 1: Reaction of Aryl and Hetaryl Ketones	178
3.4.8.1.1.2	Method 2: Reaction of Dialkyl Ketones	183
3.4.8.1.1.3	Method 3: Reaction of α,β -Unsaturated Ketones	184
3.4.8.1.1.4	Method 4: Reaction of Aryl Imines	186
3.4.8.1.2	Asymmetric 1,4-Hydrosilylations	188
3.4.8.1.2.1	Method 1: Reaction of α,β -Unsaturated Ketones and Esters	188
3.4.8.1.2.2	Method 2: Conjugate Reduction/Aldol Addition Reactions	196
3.4.8.1.2.2.1	Variation 1: Intermolecular Reactions	196
3.4.8.1.2.2.2	Variation 2: Intramolecular Reactions	200
3.4.8.1.2.3	Method 3: Reaction of α,β -Unsaturated Nitriles and Nitroalkenes	206
3.4.8.1.2.4	Method 4: Reaction of α,β -Unsaturated Sulfones	208
3.4.8.1.2.5	Method 5: Reaction of α,β -Unsaturated Phosphonates	210
3.4.8.1.2.6	Method 6: Reaction of Alkenyl-Substituted Hetarenes	211

Volume 24: Three Carbon—Heteroatom Bonds: Ketene Acetals and Yne—X Compounds

24.1	Product Class 1: 1,1-Bis(heteroatom-functionalized) Allenes	
24.1.1.3	1,1-Dihaloallenes 2014	
	K. Fuchibe and J. Ichikawa	
24.1.1.3	1,1-Dihaloallenes	217
24.1.1.3.1	Synthesis of 1,1-Dihaloallenes	217
24.1.1.3.1.1	Method 1: Eliminations from 1-(Trifluoromethyl)alk-1-enes and 1,1-Difluoroalk-1-enes	217
24.1.1.3.1.2	Method 2: Substitutions from 1,1-Difluoropropargyl Bromides	220
24.1.1.3.1.2.1	Variation 1: Reactions with Electrophiles	220
24.1.1.3.1.2.2	Variation 2: Reactions with Nucleophiles	221
24.1.1.3.2	Applications of 1,1-Dihaloallenes	222
24.1.1.3.2.1	Method 1: Reactions with Nucleophiles	222
24.1.1.3.2.1.1	Variation 1: Substitutions at the α -Carbon	223
24.1.1.3.2.1.2	Variation 2: Substitutions and Additions via Electrophilic Activation	224
24.1.1.3.2.1.3	Variation 3: Carbo- and Hydrometalations	227
24.1.1.3.2.2	Method 2: Reactions with Unsaturated Compounds	229
24.1.16	1,1-Bis(heteroatom-functionalized) Allenes 2014	
	C. Ibis	
24.1.16	1,1-Bis(heteroatom-functionalized) Allenes	233
24.1.16.1	1-Halo-1-(organochalcogeno)butatrienes	234
24.1.16.1.1	Method 1: Elimination of Hydrogen Chloride from Mono(sulfur-substituted) Buta-1,3-dienes	234
24.1.16.1.2	Method 2: Elimination of Hydrogen Chloride from Tris(sulfur-substituted) Buta-1,3-dienes	235
24.1.16.2	1,1-Bis(organochalcogeno)butatrienes	235
24.1.16.2.1	Method 1: Elimination of Hydrogen Chloride from Bis(sulfur-substituted) Buta-1,3-dienes	236
24.1.16.2.2	Method 2: Elimination of Hydrogen Chloride from Tetrakis(sulfur-substituted) Buta-1,3-dienes	236
24.1.16.2.3	Method 3: Synthesis from 2,3-Dichloro-1,1,4,4-tetrakis[4-(dimethylamino)pyridinium]buta-1,3-diene	237
24.1.16.3	1-Nitrogen-Functionalized 1-Phosphorus-Functionalized Allenes	238
24.1.16.3.1	Method 1: Synthesis from Ynamides and Related Compounds	238

24.1.16.4	1,1-Bis(phosphorus-functionalized) Allenes	241
24.1.16.4.1	Method 1: Synthesis from a 1-Bromo-1-silyllallene	241
24.1.16.4.2	Method 2: Synthesis from a Propargylic Alcohol	242
24.2	Product Class 2: 1,1-Bis(heteroatom-functionalized) Alk-1-enes	
24.2.11.3	1,1-Bis(organothioalkyl)alk-1-enes (Ketene S,S-Acetals) 2014	
	Q. Liu	
24.2.11.3	1,1-Bis(organothioalkyl)alk-1-enes (Ketene S,S-Acetals)	245
24.2.11.3.1	Synthesis of Ketene S,S-Acetals with Two Electron-Withdrawing Groups on the α -Carbon	246
24.2.11.3.1.1	Method 1: Reaction of 1,3-Dicarbonyl Derivatives with Carbon Disulfide ..	246
24.2.11.3.1.1.1	Variation 1: Reaction in Water	246
24.2.11.3.1.1.2	Variation 2: Reaction in Organic Media	248
24.2.11.3.1.2	Method 2: α -Functionalization of Ketene S,S-Acetals	251
24.2.11.3.1.2.1	Variation 1: α -Acylation Reactions	252
24.2.11.3.1.2.2	Variation 2: α -Formylation Reactions	253
24.2.11.3.1.2.3	Variation 3: α -Trifluoromethylation Reactions	256
24.2.11.3.1.2.4	Variation 4: α -Nitration Reactions	257
24.2.11.3.1.2.5	Variation 5: α -Phosphonylation Reactions	257
24.2.11.3.1.2.6	Variation 6: α -Halogenation Reactions	258
24.2.11.3.1.3	Method 3: Condensation of α,α -Diacetyl-Substituted Ketene S,S-Acetals with Aldehydes	259
24.2.11.3.1.3.1	Variation 1: Mono-Condensation	259
24.2.11.3.1.3.2	Variation 2: Double Condensation	260
24.2.11.3.1.3.3	Variation 3: Condensation To Give Unsymmetrical Ketene S,S-Acetals	262
24.2.11.3.1.4	Method 4: Condensation of α -Acetyl- α -(ethoxycarbonyl)-Substituted Ketene S,S-Acetals with Aldehydes or Ketones	263
24.2.11.3.1.4.1	Variation 1: Condensation with Arylaldehydes	263
24.2.11.3.1.4.2	Variation 2: Condensation with Electron-Deficient Aryl- or Hetarylaldehydes	265
24.2.11.3.1.4.3	Variation 3: Condensation with Ketones	267
24.2.11.3.1.5	Method 5: Condensation of α -Acetyl- α -(aminocarbonyl)-Substituted Ketene S,S-Acetals with Arylaldehydes	268
24.2.11.3.1.5.1	Variation 1: Condensation of Acyclic Ketene S,S-Acetals	268
24.2.11.3.1.5.2	Variation 2: Condensation of Cyclic Ketene S,S-Acetals	269
24.2.11.3.1.6	Method 6: Condensation of Other α -Acetyl-Substituted Ketene S,S-Acetals with Aldehydes	272
24.2.11.3.1.7	Method 7: Amination of α -Alkenoyl- α -carboxy-Substituted Ketene S,S-Acetals	273
24.2.11.3.2	Synthesis of Ketene S,S-Acetals with One Electron-Withdrawing Group on the α -Carbon	274
24.2.11.3.2.1	Method 1: Reaction of Nitromethane with Carbon Disulfide	274
24.2.11.3.2.2	Method 2: Reaction of 1,1,1-Trifluoropropan-2-one with Carbon Disulfide	275

24.2.11.3.2.3	Method 3:	Reaction of Cyclohexanone Derivatives with Carbon Disulfide	275
24.2.11.3.2.4	Method 4:	Reaction of 1,3-Dithiane with Ethyl Trifluoroacetate	277
24.2.11.3.2.5	Method 5:	α -Trifluoromethylation of Ketene <i>S,S</i> -Acetals	278
24.2.11.3.2.6	Method 6:	Deacetylation of α,α -Diacyl-Substituted Ketene <i>S,S</i> -Acetals	279
24.2.11.3.2.7	Method 7:	Decarboxylation of α -Alkenoyl- α -carboxy-Substituted Ketene <i>S,S</i> -Acetals	280
24.2.11.3.2.8	Method 8:	Condensation of α -Acetyl-Substituted Ketene <i>S,S</i> -Acetals with Aldehydes	280
24.2.11.3.3		Applications of Ketene <i>S,S</i> -Acetals in Organic Synthesis	281
24.2.11.3.3.1	Method 1:	Synthesis of Methoxyarenes by Substitution–Cycloaromatization	281
24.2.11.3.3.2	Method 2:	Synthesis of Phenols by [5 + 1] Annulation–Aromatization	282
24.2.11.3.3.3	Method 3:	Synthesis of Tricyclic Indolizidine Alkaloids by [7 + 1] Annulation–Cyclization	283
24.2.20		1,1-Bis(heteroatom-functionalized) Alk-1-enes (Update 1, 2014)	287
		P. Beier	
24.2.20		1,1-Bis(heteroatom-functionalized) Alk-1-enes (Update 1, 2014)	287
24.2.20.1		1-Halo-1-(organooxy)alk-1-enes	287
24.2.20.1.1		Synthesis of 1-Halo-1-(organooxy)alk-1-enes	287
24.2.20.1.1.1	Method 1:	Substitution of a Halogen for Oxygen	287
24.2.20.1.1.2	Method 2:	Elimination of Halogens	292
24.2.20.1.1.3	Method 3:	Decarboxylation	293
24.2.20.1.1.4	Method 4:	Addition to Alk-1-yne	293
24.2.20.1.1.5	Method 5:	Rearrangements	297
24.2.20.1.2		Applications of 1-Halo-1-(organooxy)alk-1-enes in Organic Synthesis	298
24.2.20.1.2.1	Method 1:	Substitution of Halogens	298
24.2.20.1.2.2	Method 2:	Elimination of Halogens	301
24.2.20.1.2.3	Method 3:	Addition to the Double Bond	304
24.2.20.1.2.4	Method 4:	Radical Additions	305
24.2.20.1.2.5	Method 5:	[2 + 2] Cycloadditions	305
24.2.20.1.2.6	Method 6:	[4 + 2] Cycloadditions	306
24.2.20.1.2.7	Method 7:	Synthesis of Heterocyclic Compounds	307
24.2.20.1.2.8	Method 8:	Rearrangements	310
24.2.20.1.2.9	Method 9:	Miscellaneous Applications	310
24.2.20.2		1-Halo-1-(organochalcogeno)alk-1-enes	312
24.2.20.2.1		Synthesis of 1-Halo-1-(organochalcogeno)alk-1-enes	312
24.2.20.2.1.1	Method 1:	Substitution of Hydrogen for a Halogen	312
24.2.20.2.1.2	Method 2:	Substitution of a Metal for a Halogen	313
24.2.20.2.1.3	Method 3:	Substitution of a Metal for a Chalcogen	314
24.2.20.2.1.4	Method 4:	Substitution of a Halogen for a Chalcogen	315
24.2.20.2.1.5	Method 5:	Substitution of a Chalcogen for a Chalcogen	318
24.2.20.2.1.6	Method 6:	Elimination of Hydrogen Halides or Halogens	319

24.2.20.2.1.7	Method 7:	Miscellaneous Eliminations	320
24.2.20.2.1.8	Method 8:	Wittig-Type Reactions	324
24.2.20.2.1.9	Method 9:	Oxidation of 1-Halovinyl Sulfides	324
24.2.20.2.1.10	Method 10:	Addition of Hydrogen Halides to Alk-1-yne	325
24.2.20.2.1.11	Method 11:	Addition of Halogens to Alk-1-yne	326
24.2.20.2.1.12	Method 12:	Radical Additions of Alkyl Halides to Alk-1-yne	326
24.2.20.2.1.13	Method 13:	Addition of Heteroelement Halides to Alk-1-yne	327
24.2.20.2.1.14	Method 14:	Miscellaneous Additions to Alk-1-yne	327
24.2.20.2.1.15	Method 15:	Rearrangements	330
24.2.20.3		1-Nitrogen-Functionalized 1-Haloalk-1-enes	331
24.2.20.3.1		Synthesis of 1-Nitrogen-Functionalized 1-Haloalk-1-enes	332
24.2.20.3.1.1	Method 1:	Substitution of a Halogen for Nitrogen	332
24.2.20.3.1.2	Method 2:	Eliminations	333
24.2.20.3.1.3	Method 3:	Addition to Alk-1-yne	335
24.2.20.3.1.4	Method 4:	Synthesis from Amides	338
24.2.20.3.2		Applications of 1-Nitrogen-Functionalized 1-Haloalk-1-enes in Organic Synthesis	338
24.2.20.3.2.1	Method 1:	Substitution of Halogens	338
24.2.20.3.2.2	Method 2:	Cycloadditions	339
24.2.20.3.2.3	Method 3:	Synthesis of Heterocyclic Compounds	340
24.2.20.4		1-Phosphorus-Functionalized 1-Haloalk-1-enes	343
24.2.20.4.1		Synthesis of 1-Phosphorus-Functionalized 1-Haloalk-1-enes	344
24.2.20.4.1.1	Method 1:	Substitution of a Metal for a Halogen	344
24.2.20.4.1.2	Method 2:	Substitution of a Metal for Phosphorus	347
24.2.20.4.1.3	Method 3:	Substitution of a Halogen for Phosphorus	347
24.2.20.4.1.4	Method 4:	Substitution of a Carboxy Group for a Halogen	348
24.2.20.4.1.5	Method 5:	Elimination Reactions	349
24.2.20.4.1.6	Method 6:	Addition to Alk-1-yne	350
24.2.20.4.1.7	Method 7:	Condensation Reactions	350
24.2.20.4.2		Applications of 1-Phosphorus-Functionalized 1-Haloalk-1-enes in Organic Synthesis	351
24.2.21		1,1-Bis(heteroatom-functionalized) Alk-1-enes (Update 2, 2014)	359
		M. H. Vilhelmsen	
24.2.21		1,1-Bis(heteroatom-functionalized) Alk-1-enes (Update 2, 2014)	359
24.2.21.1		1-(Organooxy)-1-(organosulfanyl)alk-1-enes (Ketene <i>O,S</i> -Acetals)	359
24.2.21.1.1	Method 1:	Synthesis from Xanthates	359
24.2.21.1.2	Method 2:	Synthesis by Rearrangement of Carbohydrate Epoxides	361
24.2.21.1.3	Method 3:	Synthesis as Part of 2-Alkylidene-1,3-oxathiolanes	362
24.2.21.1.4	Method 4:	Synthesis as Part of 2-Alkylidene-1,3-oxathioles	363
24.2.21.1.5	Method 5:	Synthesis as Part of Dihydropyranone Derivatives	366
24.2.21.1.6	Method 6:	Synthesis as Part of Furan Derivatives	368

24.2.21.2	1-Nitrogen-Functionalized 1-(Organooxy)alk-1-enes (Ketene <i>O,N</i> -Acetals) ···	368
24.2.21.2.1	Method 1: Synthesis from Halogenated Vinyl Ethers	368
24.2.21.2.2	Method 2: Synthesis as Part of Heterocycles	369
24.2.21.2.2.1	Variation 1: Synthesis of 2-Alkylideneoxazolidines	369
24.2.21.2.2.2	Variation 2: Synthesis of 1,3-Dioxol-4-amines	371
24.2.21.2.2.3	Variation 3: Synthesis of 2-Alkylidene-1,3-oxazines	371
24.2.21.2.2.4	Variation 4: Synthesis of Fused Indole Derivatives	373
24.2.21.3	1-Phosphorus-Functionalized 1-(Organooxy)alk-1-enes	374
24.2.21.3.1	Method 1: Synthesis from α -Oxo Phosphonates	374

Volume 27: Heteroatom Analogues of Aldehydes and Ketones

27.1 Product Class 1: Sulfur Ylides

27.1.6	Sulfur Ylides 2014	
	G. Mlostoń and H. Heimgartner	
27.1.6	Sulfur Ylides	377
27.1.6.1	Thiocarbonyl Ylides	377
27.1.6.1.1	Synthesis of Thiocarbonyl Ylides	377
27.1.6.1.2	Applications of Thiocarbonyl Ylides in Organic Synthesis	377
27.1.6.1.2.1	Method 1: Synthesis of Five-Membered Sulfur-Containing Heterocycles by 1,3-Dipolar Cycloaddition Reactions	377
27.1.6.1.2.1.1	Variation 1: Reaction of Thiocarbonyl Ylides Generated by 1,3-Elimination of Halotrimethylsilane	378
27.1.6.1.2.1.2	Variation 2: Reaction of Thiocarbonyl Ylides Generated by Cycloreversion of 2,5-Dihydro-1,3,4-thiadiazoles	378
27.1.6.1.2.1.3	Variation 3: Reaction of Thiocarbonyl Ylides Generated from Bis[(tri- methylsilyl)methyl] Sulfoxide	380
27.1.6.1.2.2	Method 2: Synthesis of Sulfides, Thioacetals, Dithioacetals, and Thio- aminals from 1,3-Addition Reactions of Thiocarbonyl Ylides ·	380
27.1.6.1.2.3	Method 3: Synthesis of Thiiranes by 1,3-Electrocyclization Reactions of Thiocarbonyl Ylides	381
27.1.6.1.2.3.1	Variation 1: Reaction of Thiocarbonyl Ylides Generated by Extrusion of Molecular Nitrogen from 2,5-Dihydro-1,3,4-thiadiazoles ····	381
27.1.6.1.2.3.2	Variation 2: Reaction of Thiocarbonyl Ylides Generated by Addition of Carbenes to Thiocarbonyl Compounds	382
27.1.6.1.2.4	Method 4: Synthesis of 1,3-Oxathiole Derivatives by 1,5-Electrocycliza- tion Reactions of Thiocarbonyl Ylides	382
27.1.6.1.2.5	Method 5: Synthesis of 1,4-Dithianes and 1,3-Dithiolanes via Dimeriza- tion of Thiocarbonyl Ylides	383
27.1.6.2	Sulfoxonium Ylides	384
27.1.6.2.1	Synthesis of Sulfoxonium Ylides	385

27.1.6.2.1.1	Method 1:	Synthesis by Hydrogen Atom Substitution on Existing Sulfoxonium Ylides	385
27.1.6.2.1.1.1	Variation 1:	Synthesis of Carbonyl-Stabilized Sulfoxonium Ylides	385
27.1.6.2.1.2	Method 2:	Synthesis by Reaction of Sulfoxides with Carbenes	385
27.1.6.2.1.2.1	Variation 1:	Reaction with Carbenes Generated from Transition-Metal-Catalyzed Decomposition of Diazo Compounds	385
27.1.6.2.1.2.2	Variation 2:	Reaction with Carbenes Generated from Iodonium Salts	385
27.1.6.2.2	Applications of Sulfoxonium Ylides in Organic Synthesis		386
27.1.6.2.2.1	Method 1:	Reaction with Aldehydes and Ketones	386
27.1.6.2.2.2	Method 2:	Reaction with Electron-Deficient Alkenes	386
27.1.6.2.2.3	Method 3:	Reaction with Weakly Acidic Nucleophiles (Alkylation of R ¹ XH)	388
27.1.6.2.2.4	Method 4:	Ring Expansion of Epoxides and Aziridines	389
27.4	Product Class 4: Thioaldehyde and Thioketone S-Oxides and S-Imides (Sulfines and Derivatives)		
27.4.3	Thioaldehyde and Thioketone S-Oxides and S-Imides (Sulfines and Derivatives)		2014
	G. Mlostoń and H. Heimgartner		
27.4.3	Thioaldehyde and Thioketone S-Oxides and S-Imides (Sulfines and Derivatives) 393		
27.4.3.1	Thioketone S-Oxides (Sulfines) 393		
27.4.3.1.1	Synthesis of Thioketone S-Oxides (Sulfines) 393		
27.4.3.1.1.1	Method 1:	Desulfurization of Dithiirane S-Oxides	393
27.4.3.1.1.2	Method 2:	Oxidative Rearrangement of Aryl Arylmethyl Sulfides	394
27.4.3.1.1.3	Method 3:	Oxidative Ring Opening of Thiophenes	394
27.4.3.1.2	Applications of Thioketone S-Oxides (Sulfines) in Organic Synthesis 395		
27.4.3.1.2.1	Method 1:	1,3-Dipolar Cycloaddition Reactions	395
27.4.3.2	Thioketone S-Imides 395		
27.4.3.2.1	Synthesis of Thioketone S-Imides 395		
27.4.3.2.1.1	Method 1:	Reaction of α -Chlorosulfonyl Chlorides with N-Silylated Amines	396
27.4.3.2.1.2	Method 2:	Reaction of 2,2,4,4-Tetramethyl-3-thioxocyclobutanone with Aryl Azides	396
27.4.3.2.1.3	Method 3:	Reaction of 3-Azidobenz[c]isothiazoles with Diazo Compounds	397
27.4.3.2.2	Applications of Thioketone S-Imides in Organic Synthesis 397		
27.4.3.2.2.1	Method 1:	1,3-Dipolar Cycloaddition Reactions	397

27.26	Product Class 26: Thioaldehyde and Thioketone S-Sulfides (Thiosulfines)	New
	G. Mlostoń and H. Heimgartner	
<hr/>		
27.26	Product Class 26: Thioaldehyde and Thioketone S-Sulfides (Thiosulfines)	403
27.26.1	Synthesis of Product Class 26	403
27.26.1.1	Method 1: Reaction of Aromatic Thioketones with Thiiranes	403
27.26.1.2	Method 2: Reaction of Thioketones with Organic Azides	404
27.26.1.3	Method 3: Reaction of Thioketones with Chloramine-T	404
27.26.1.4	Method 4: Reaction of Thioketones with Potassium 4-Toluenethiosulfonate	404
27.26.1.5	Method 5: Reaction of Thioketones with Elemental Sulfur and Other Thionating Agents	404
27.26.1.6	Method 6: Reaction of Ketone Hydrazones with Disulfur Dichloride	405
27.26.1.7	Method 7: Reaction of Phosphorus Ylides with Elemental Sulfur	405
27.26.1.8	Method 8: Thermolysis of 3,3,5,5-Tetraaryl-1,2,4-trithiolanes	405
27.26.1.9	Method 9: Reaction of S-Acetyl S'-Chloromethyl Disulfide with Secondary Amines	405
27.26.2	Applications of Product Class 26 in Organic Synthesis	405
27.26.2.1	Method 1: 1,3-Dipolar Cycloaddition Reactions	406
27.26.2.2	Method 2: Other Cycloaddition Reactions	408
27.26.2.3	Method 3: Dimerization Reactions	409
27.26.2.4	Method 4: Synthesis of Sulfur-Rich Heterocycles	409

Volume 35: Chlorine, Bromine, and Iodine

35.1	Product Class 1: One Saturated Carbon—Chlorine Bond	
<hr/>		
35.1.1.3.5	Synthesis by Substitution of Carbon Functionalities	2014
	P. Margaretha	
<hr/>		
35.1.1.3.5	Synthesis by Substitution of Carbon Functionalities	413
35.1.1.3.5.1	Method 1: Decarbonylation of Acyl Chlorides	413
35.1.1.3.5.2	Method 2: Chlorodecarboxylation of Silver Salts of Carboxylic Acids	414
35.1.1.3.5.3	Method 3: Chlorodecarboxylation of Carboxylic Acids by Lead(IV) Acetate	415
35.1.1.3.5.4	Method 4: Chlorodecarboxylation of 1-(Acyloxy)pyridine-2(1H)-thiones	417
35.1.1.3.5.5	Method 5: Homolytically Induced Decomposition of Peroxyacetals and Cyclic Dialkylperoxides	418
35.1.1.3.5.6	Method 6: Chlorodeacylation of β -Oxo Esters	420

35.1.1.4.3	Synthesis by Substitution of Other Halogens	2014
	P. Margaretha	
<hr/>		
35.1.1.4.3	Synthesis by Substitution of Other Halogens	423
35.1.1.5.13	Synthesis by Substitution of Oxygen Functionalities	2014
	P. Margaretha	
<hr/>		
35.1.1.5.13	Synthesis by Substitution of Oxygen Functionalities	425
35.1.1.5.13.1	Method 1: Decarboxylation of Chloroformates	425
35.1.1.5.13.2	Method 2: Synthesis from Alkanesulfonates	426
35.1.1.5.13.3	Method 3: Chlorodehydroxylation with Hydrogen Chloride	427
35.1.1.5.13.4	Method 4: Chlorodehydroxylation with a Metal Chloride	428
35.1.1.5.13.5	Method 5: Chlorodehydroxylation with Thionyl Chloride	430
35.1.1.5.13.5.1	Variation 1: In an Organic Solvent in the Absence of an Added Base	430
35.1.1.5.13.5.2	Variation 2: In an Organic Solvent in the Presence of a Base	431
35.1.1.5.13.6	Method 6: Chlorodehydroxylation with XtalFluor-E/Tetraethylammonium Chloride	433
35.1.1.5.13.7	Method 7: Chlorodehydroxylation with <i>N</i> -Chlorosuccinimide	434
35.1.1.5.13.8	Method 8: Chlorodehydroxylation with Chlorides of Phosphoric Acid ...	434
35.1.1.5.13.9	Method 9: Chlorodehydroxylation via Oxyphosphonium Intermediates ·	435
35.1.1.5.13.10	Method 10: Chlorodehydroxylation with Bis(trichloromethyl) Carbonate ·	437
35.1.1.5.13.11	Method 11: Chlorodehydroxylation with Dimethylformamide/Acyl Chlorides	438
35.1.1.5.13.12	Method 12: Chlorodehydroxylation with Chlorodimethylsilane	439
35.1.1.6.2	Synthesis by Substitution of Sulfur, Selenium, or Tellurium Functionalities	2014
	P. Margaretha	
<hr/>		
35.1.1.6.2	Synthesis by Substitution of Sulfur, Selenium, or Tellurium Functionalities	443
35.1.4.2.4	Synthesis by Substitution of σ-Bonded Heteroatoms	2014
	P. Margaretha	
<hr/>		
35.1.4.2.4	Synthesis by Substitution of σ-Bonded Heteroatoms	445
35.1.4.2.4.1	Method 1: Substitution of σ -Bonded Oxygen Functionalities with Concomitant Allylic Rearrangement	445
35.1.4.2.4.1.1	Variation 1: Allylic Chlorides from Allylic Alcohols	446
35.1.4.2.4.1.2	Variation 2: Allylic Chlorides from Intermediate Alkoxides	448

35.2	Product Class 2: One Saturated Carbon—Bromine Bond	
35.2.1.3.5	Synthesis by Substitution of Carbon Functionalities	2014
	P. Margaretha	
35.2.1.3.5	Synthesis by Substitution of Carbon Functionalities	451
35.2.1.3.5.1	Method 1: Bromodecarboxylation of Heavy Metal Salts of Carboxylic Acids	452
35.2.1.3.5.1.1	Variation 1: Using Isolated Silver Salts	452
35.2.1.3.5.1.2	Variation 2: From Carboxylic Acids in the Presence of Mercury(II) Oxide and Bromine	453
35.2.1.3.5.2	Method 2: Bromodecarboxylation of 1-(Acyloxy)pyridine-2(1 <i>H</i>)-thiones	454
35.2.1.3.5.2.1	Variation 1: Formation of <i>N</i> -(Acyloxy)pyridinethiones from Acyl Chlorides	455
35.2.1.3.5.2.2	Variation 2: Formation of <i>N</i> -Acyloxy-pyridine-2-thiones from Carboxylic Acids	456
35.2.1.3.5.3	Method 3: Bromodecarboxylation of Carboxylic Acids by (Diacetoxy-iodo)benzene	458
35.2.1.3.5.4	Method 4: Homolytically Induced Decomposition of Peroxyacetals	459
35.2.1.3.5.5	Method 5: Bromodeacylation of β -Oxo Esters	460
35.2.1.8.10	Synthesis by Addition to π-Type C—C Bonds	2014
	Q. Yin and S.-L. You	
35.2.1.8.10	Synthesis by Addition to π-Type C—C Bonds	463
35.2.1.8.10.1	Carbobromination	463
35.2.1.8.10.1.1	Method 1: Bromocyclization	463
35.2.1.8.10.1.2	Method 2: Asymmetric Intramolecular Carbobromination	465
