

Science of Synthesis Knowledge Updates 2021/2

	Preface	V
	Abstracts	VII
	Table of Contents	XV
5.1.7	Product Subclass 7: Germylenes N. Takeda	1
5.2.24.10	Arylstannanes (Update 2021) J. Vrána and A. Růžička	27
6.1.29.16	α-Boryl Carbonyl Compounds (Update 2021) A. Trofimova, M. Sirvinskas, and A. K. Yudin	59
6.1.43	Product Subclass 43: Azaborines (Borazines) G. H. M. Davies and S. R. Wisniewski	111
14.6.5	Thiopyrylium Salts (Update 2021) M. Wang and X. Jiang	223
27.27	Product Class 27: 1,2-Diimines R. Isovitsch	235
27.28	Product Class 28: β-Diketimines (1,3-Diimines) K. Chand, Umesh, D. P. Dorairaj, and S. C. N. Hsu	259
40.1.8	Product Subclass 8: Piperazines Z.-S. Ye	303
48.3.3	Cyclobutanes (Update 2021) Y. Xiong, R. Guo, and G. Z. Zhang	419
	Author Index	449
	Abbreviations	467

Table of Contents

Volume 5: Compounds of Group 14 (Ge, Sn, Pb)

5.1	Product Class 1: Germanium Compounds	
5.1.7	Product Subclass 7: Germylenes	2021
	N. Takeda	
5.1.7	Product Subclass 7: Germylenes	1
5.1.7.1	Substitution Reactions of Divalent Germanium Compounds with Nucleophiles	2
5.1.7.1.1	Method 1: Substitution of Halides with Alkyl or Aryl Group 1 or 2 Metal Compounds	2
5.1.7.1.2	Method 2: Substitution of Amino Groups by Nucleophiles	8
5.1.7.1.3	Method 3: Substitution of a Pentamethylcyclopentadienyl Group with Organolithium Compounds	9
5.1.7.2	Reductions of Dihalogermanes	10
5.1.7.2.1	Method 1: Reductions of Dihalogermanes with Sodium or Alkali Metal Compounds	10
5.1.7.3	Dissociation from Adducts of Germylenes	12
5.1.7.3.1	Method 1: Dissociation of P ₄ and Phosphine Adducts of Germylenes	12
5.1.7.4	Insertion into Ge—X Bonds of Germylenes	14
5.1.7.4.1	Method 1: Insertion into Ge—H, Ge—B, and Ge—C Bonds of Germylenes	14
5.1.7.4.2	Method 2: Insertion into the Ge—Ge Bond of Digermynes	20
5.1.7.5	Addition to Digermynes	21
5.1.7.5.1	Method 1: Addition of Isocyanide and TEMPO to Digermynes	21
5.1.7.6	Modification of the Substituents on the Germylene	23
5.1.7.6.1	Method 1: Borane-Catalyzed Substitution of Silyl Groups of Amino[bis(silyl)methyl]germylenes	23
5.2	Product Class 2: Tin Compounds	
5.2.24.10	Arylstannanes	2021
	J. Vrána and A. Růžička	
5.2.24.10	Arylstannanes	27
5.2.24.10.1	Synthesis of Arylstannanes	27
5.2.24.10.1.1	Method 1: Reaction of Aryl Anions with Alkyl- or Aryltin Halides	27
5.2.24.10.1.2	Method 2: Coupling of Aryl Halides or Arylazo Sulfones with Hexaalkyldistannanes	27

5.2.24.10.1.3	Method 3:	Catalytic C—H Bond Stannylation of Fluorinated Arenes by a Trialkyl(vinyl)stannane	29
5.2.24.10.1.4	Method 4:	Sandmeyer-Type Reaction of Diazonium Salts with Hexamethyldistannane	31
5.2.24.10.1.5	Method 5:	Conversion of Ester or Acyl Fluoride Groups into Stannanes ..	33
5.2.24.10.1.6	Method 6:	Palladium-Catalyzed Desulfinate Coupling of Sodium Arenesulfonates with Distannanes	35
5.2.24.10.1.7	Method 7:	Nickel-Catalyzed Coupling of Aryl Halides or Trifluoromethanesulfonates with Tributyltin Methoxide	36
5.2.24.10.1.8	Miscellaneous Methods	37
5.2.24.10.2	Applications of Arylstannanes in Organic Synthesis	37
5.2.24.10.2.1	Method 1:	Metal–Tin Exchange of Aryl- and Hetarylstannanes	38
5.2.24.10.2.2	Method 2:	Electrophilic Substitution of Aryl- and Hetarylstannanes	45
5.2.24.10.2.2.1	Variation 1:	Halodestannylation	45
5.2.24.10.2.2.2	Variation 2:	Electrophilic Destannylation with Acyl Halides	50
5.2.24.10.2.3	Method 3:	Metal-Catalyzed Coupling of Aryl- and Hetarylstannanes	51
5.2.24.10.2.4	Method 4:	Oxidative Addition to C—Sn Bonds	55

Volume 6: Boron Compounds

6.1 Product Class 1: Boron Compounds

6.1.29.16	α-Boryl Carbonyl Compounds	2021
	A. Trofimova, M. Sirvinskas, and A. K. Yudin	
6.1.29.16	α-Boryl Carbonyl Compounds	59
6.1.29.16.1	α -Boryl Aldehydes	59
6.1.29.16.1.1	Method 1: Synthesis of α -Boryl Aldehydes from <i>N</i> -Alkyliminodiacetyl Oxiranylboronates	59
6.1.29.16.2	α -Boryl Ketones	62
6.1.29.16.2.1	Method 1: Synthesis of α -Boryl Ketones via <i>tert</i> -Butyl Hydroperoxide Mediated Wacker-Type Oxidation	62
6.1.29.16.2.2	Method 2: Synthesis of α -Hydroxy α -Boryl Ketones	63
6.1.29.16.2.3	Method 3: Synthesis of Halogenated α -Boryl Ketones by Oxidative Difunctionalization of Alkenylboronates	65
6.1.29.16.2.4	Method 4: Synthesis of Aliphatic α -Boryl α -Bromo Ketones	69
6.1.29.16.2.5	Method 5: Asymmetric B—H Insertion Reaction of α -Diazo Ketones	71
6.1.29.16.2.6	Method 6: Gold(I)-Catalyzed Oxidative Coupling of Terminal Alkynes and Borane Adducts	73
6.1.29.16.2.7	Method 7: Iridium-Catalyzed B—H Insertion of Sulfoxonium Ylides and Trimethylamine–Borane Adduct	75
6.1.29.16.2.8	Method 8: Synthesis of α -N-Heterocyclic Carbene Boryl Ketones	79

6.1.29.16.3	α -Boryl Carboxylic Acids	81
6.1.29.16.3.1	Method 1: Synthesis of α -Boryl Carboxylic Acids by Oxidation of α -Boryl Aldehydes	81
6.1.29.16.3.2	Method 2: Hydrolysis of α -Boryl Esters	83
6.1.29.16.4	α -Boryl Esters and Amides	84
6.1.29.16.4.1	Method 1: Diboration of α,β -Unsaturated Carbonyl Substrates with Bis(pinacolato)diboron	84
6.1.29.16.4.2	Method 2: Insertion Reactions of Rhodium Carbenes into B—H Bonds of N-Heterocyclic Carbene Borane Complexes	86
6.1.29.16.4.3	Method 3: Synthesis of α -Boryl Esters by Copper-Catalyzed B—H Bond Insertion Reactions	90
6.1.29.16.4.4	Method 4: Synthesis of α -Alkoxy carbonyl-Substituted Vinylboronates ..	93
6.1.29.16.4.5	Method 5: Synthesis of α -Boryl Esters by Reductive α -Borylation	95
6.1.29.16.4.6	Method 6: Radical α -Borylation of α,β -Unsaturated Carbonyl Compounds	97
6.1.29.16.4.7	Method 7: Copper-Catalyzed Synthesis of C-Boron Enolates	102
6.1.29.16.4.8	Method 8: Synthesis of α -Boryl Homoallyl Esters by B—H Insertion Reaction	104
6.1.29.16.4.9	Method 9: Copper-Catalyzed Synthesis of α -Boryl Amides	106
6.1.29.16.4.10	Method 10: Synthesis of Carboranyl amides	107

6.1.43 **Product Subclass 43: Azaborines (Borazines)** New
G. H. M. Davies and S. R. Wisniewski

6.1.43	Product Subclass 43: Azaborines (Borazines)	111
6.1.43.1	1,2-Azaborines	112
6.1.43.1.1	Synthesis of 1,2-Azaborines	112
6.1.43.1.1.1	Method 1: Dehydrogenation	112
6.1.43.1.1.2	Method 2: Ring-Closing Metathesis	113
6.1.43.1.1.3	Method 3: Ring Expansion	114
6.1.43.1.2	Applications of 1,2-Azaborines in Organic Synthesis	117
6.1.43.1.2.1	Method 1: Nucleophilic Substitution at Boron and/or Nitrogen	117
6.1.43.1.2.2	Method 2: Transition-Metal-Catalyzed Boron Arylation	119
6.1.43.1.2.3	Method 3: B—H Bond Activation/Functionalization	120
6.1.43.1.2.4	Method 4: Electrophilic Aromatic Substitution	121
6.1.43.1.2.5	Method 5: Nitration	125
6.1.43.1.2.6	Method 6: Negishi Coupling	125
6.1.43.1.2.7	Method 7: C—H Borylation	130
6.1.43.1.2.8	Method 8: Boron Protecting-Group Strategy	133
6.1.43.1.2.9	Method 9: Diels–Alder Cyclization of 1,2-Azaborines	135
6.1.43.1.2.10	Method 10: Photoisomerization to Cyclobutanes	137
6.1.43.1.2.11	Method 11: Oligomerization and Polymerization of 1,2-Azaborines	138

6.1.43.2	1,3-Azaborines	143
6.1.43.2.1	Synthesis of 1,3-Azaborines	143
6.1.43.2.1.1	Method 1: Ring-Closing Metathesis/Dehydrogenation	143
6.1.43.2.1.2	Method 2: Bora-Nazarov-Type Cyclization	145
6.1.43.2.2	Applications of 1,3-Azaborines in Organic Synthesis	147
6.1.43.2.2.1	Method 1: Substitution at Boron	147
6.1.43.2.2.2	Method 2: Electrophilic Aromatic Substitution	148
6.1.43.3	1,4-Azaborines	149
6.1.43.3.1	Synthesis of 1,4-Azaborines	149
6.1.43.3.1.1	Method 1: Rhodium-Catalyzed [2 + 2 + 2] Cyclization	149
6.1.43.3.1.2	Method 2: Modular Synthesis of 1,4-Azaborines	149
6.1.43.3.2	Applications of 1,4-Azaborines in Organic Synthesis	151
6.1.43.3.2.1	Method 1: Nucleophilic Substitution at Boron	151
6.1.43.4	1,2-Borazaronaphthalenes	153
6.1.43.4.1	Synthesis of 1,2-Borazaronaphthalenes	153
6.1.43.4.1.1	Method 1: Base-Promoted Borylation of Imines	153
6.1.43.4.1.2	Method 2: Horner–Wadsworth–Emmons Alkenation	154
6.1.43.4.1.3	Method 3: Base-Mediated Condensation	155
6.1.43.4.2	Applications of 1,2-Borazaronaphthalenes in Organic Synthesis	156
6.1.43.4.2.1	Method 1: Nucleophilic Substitution at Boron	156
6.1.43.5	2,1-Borazaronaphthalenes	157
6.1.43.5.1	Synthesis of 2,1-Borazaronaphthalenes	157
6.1.43.5.1.1	Method 1: Annulation with 2-Aminostyrene and Trihaloboranes	157
6.1.43.5.1.2	Method 2: Annulation with 2-Aminostyrene and Organodichloroboranes	158
6.1.43.5.1.3	Method 3: Annulation with 2-Aminostyrenes and Organotrifluoroborates	159
6.1.43.5.1.4	Method 4: Cyclization Reaction with Anilines, Alkynes, and Organodichloroboranes	164
6.1.43.5.1.5	Method 5: Cyclization Reaction between 2-Alkynylanilines and Organodichloroboranes	165
6.1.43.5.1.6	Method 6: Ring Expansion of Indoles with Pinacol Arylboronates	165
6.1.43.5.2	Applications of 2,1-Borazaronaphthalenes in Organic Synthesis	167
6.1.43.5.2.1	Method 1: Formation of the Parent Compound via Reduction	167
6.1.43.5.2.2	Method 2: Substitution at Boron with an Organometallic Reagent	167
6.1.43.5.2.3	Method 3: N-Substitution via Alkylation	169
6.1.43.5.2.4	Method 4: Amination of 2-(Chloromethyl)-2,1-borazaronaphthalene	171
6.1.43.5.2.5	Method 5: Halogenation of 2,1-Borazaronaphthalenes	172
6.1.43.5.2.6	Method 6: Rhodium-Catalyzed B-Arylation of 2,1-Borazaronaphthalenes	174
6.1.43.5.2.7	Method 7: Suzuki–Miyaura Cross Coupling of Brominated 2,1-Borazaronaphthalenes	175
6.1.43.5.2.8	Method 8: Iridium-Catalyzed Borylation of 2,1-Borazaronaphthalenes ..	181

6.1.43.5.2.9	Method 9:	Suzuki–Miyaura Cross Coupling of 8-Borylated 2,1-Borazaronaphthalenes	183
6.1.43.5.2.10	Method 10:	Palladium-Catalyzed Borylation of 2,1-Borazaronaphthalenes ·	184
6.1.43.5.2.11	Method 11:	Preparation of (2,1-Borazaronaphthalen-3-yl)trifluoroborates ·	185
6.1.43.5.2.12	Method 12:	Suzuki–Miyaura Cross Coupling of 3-Borylated 2,1-Borazaronaphthalenes	186
6.1.43.5.2.13	Method 13:	Kumada Coupling of Brominated 2,1-Borazaronaphthalenes ·	188
6.1.43.5.2.14	Method 14:	Reductive Coupling of Brominated 2,1-Borazaronaphthalenes	189
6.1.43.5.2.15	Method 15:	Photoredox Functionalization of Bromine-Containing 2,1-Borazaronaphthalenes	190
6.1.43.5.2.16	Method 16:	Photoredox Functionalization of 3-Bromo- 2,1-borazaronaphthalenes	192
6.1.43.5.2.17	Method 17:	Preparation of 1-(Trifluoroboratomethyl)- 2,1-borazaronaphthalenes	193
6.1.43.5.2.18	Method 18:	Photoredox Functionalization of 1-(Trifluoroboratomethyl)- 2,1-borazaronaphthalenes	194
6.1.43.5.2.19	Method 19:	Carboxylate Substitution of 2-(Chloromethyl)- 2,1-borazaronaphthalene	196
6.1.43.5.2.20	Method 20:	Formation of and Click Reaction with 2-(Azidomethyl)- 2,1-borazaronaphthalene	197
6.1.43.5.2.21	Method 21:	Suzuki–Miyaura Cross Coupling of 2-(Chloromethyl)- 2,1-borazaronaphthalene	198
6.1.43.5.2.22	Method 22:	Sonogashira Cross Coupling of 2-(Chloromethyl)- 2,1-borazaronaphthalene	200
6.1.43.6		1,4-Borazaronaphthalenes	201
6.1.43.6.1		Synthesis of 1,4-Borazaronaphthalenes	201
6.1.43.6.1.1	Method 1:	Ring-Closing Metathesis	201
6.1.43.6.1.2	Method 2:	[4 + 2]-Annulation Strategy to 1,4-Borazaronaphthalenes ···	203
6.1.43.6.2		Applications of 1,4-Borazaronaphthalenes in Organic Synthesis	204
6.1.43.6.2.1	Method 1:	Nucleophilic Substitution at Boron	204
6.1.43.6.2.2	Method 2:	Conversion of 1,4-Borazaronaphthalenes into Indoles	206
6.1.43.7		1,9-Borazaronaphthalenes	207
6.1.43.7.1		Synthesis of 1,9-Borazaronaphthalenes	207
6.1.43.7.1.1	Method 1:	Ring-Closing Metathesis	207
6.1.43.8		9,1-Borazaronaphthalenes	209
6.1.43.8.1		Synthesis of 9,1-Borazaronaphthalenes	209
6.1.43.8.1.1	Method 1:	Ring-Closing Metathesis	209
6.1.43.9		9,10-Borazaronaphthalenes	210
6.1.43.9.1		Synthesis of Fused 9,10-Borazaronaphthalenes	210
6.1.43.9.1.1	Method 1:	Hydroboration	210
6.1.43.9.1.2	Method 2:	Ring Expansion	210
6.1.43.9.1.3	Method 3:	Ring-Closing Metathesis	212

6.1.43.9.2	Applications of 9,10-Borazaronaphthalenes in Organic Synthesis	214
6.1.43.9.2.1	Method 1: Electrophilic Aromatic Substitution	214
6.1.43.9.2.2	Method 2: Nitration of 9,10-Borazaronaphthalene	216
6.1.43.9.2.3	Method 3: Base-Activated Functionalization	217
6.1.43.9.2.4	Method 4: Cross Coupling of 9,10-Borazaronaphthalenes	218

Volume 14: Six-Membered Hetarenes with One Chalcogen

14.6 Product Class 6: Thiopyrylium Salts

14.6.5	Thiopyrylium Salts	2021
	M. Wang and X. Jiang	
14.6.5	Thiopyrylium Salts	223
14.6.5.1	Synthesis by Ring-Closure Reactions	223
14.6.5.1.1	By Formation of Two S—C and Two C—C Bonds	223
14.6.5.1.2	By Formation of Two S—C Bonds	224
14.6.5.1.3	By Formation of Two C—C Bonds	228
14.6.5.1.4	By Formation of One S—C Bond	229
14.6.5.2	Synthesis by Ring Transformation	229
14.6.5.2.1	Ring Enlargement	229
14.6.5.3	Aromatization	230
14.6.5.3.1	By Elimination	230
14.6.5.3.2	By Dehydrogenation	232

Volume 27: Heteroatom Analogues of Aldehydes and Ketones

27.27	Product Class 27: 1,2-Diimines	New
	R. Isovitsch	
27.27	Product Class 27: 1,2-Diimines	235
27.27.1	Method 1: Synthesis of 1,2-Diimines via Simple Condensation Reactions	235
27.27.1.1	Variation 1: Ultrasound-Mediated Condensation under Solvent-Free Conditions	236
27.27.1.2	Variation 2: Condensation of the Pharmacophore of the Protein Kinase Inhibitor Indirubin with Aniline Derivatives	237
27.27.1.3	Variation 3: Formation of a 1,2-Diimine from 1,2-Bis(2-hydroxyphenyl)ethane-1,2-dione and a Chiral Amino Alcohol	238
27.27.1.4	Variation 4: Synthesis of Unsymmetrically N-Substituted 1,2-Diimines	239

27.27.1.5	Variation 5:	Synthesis of a Sterically Crowded Butane-1,2-diimine	244
27.27.2	Method 2:	Synthesis of 1,2-Diimines via Metal-Promoted Condensation Reactions	244
27.27.2.1	Variation 1:	Titanium(IV) Chloride Catalyzed Condensation	244
27.27.2.2	Variation 2:	Trimethylaluminum-Assisted Synthesis of Camphor-Based 1,2-Diimines	248
27.27.2.3	Variation 3:	1,2-Diimines Built on an Acenaphthylene Framework	250
27.27.3	Method 3:	Oxidation of Benzene-1,2-diamines with Lead(IV) Acetate To Yield Cyclohexadiene-1,2-diimines	251
27.27.4	Method 4:	Nickel(II)-Catalyzed Coupling of Chiral Dihydroisoquinolin-1-ones	252
27.27.5	Method 5:	Palladium-Catalyzed Coupling of Isocyanides and Tetraarylead Compounds	253
27.27.6	Method 6:	Ytterbium-Mediated Reductive Dimerization/Oxidative Dehydrogenation of Imines	254
27.28	Product Class 28: β-Diketimines (1,3-Diimines)		New
	K. Chand, Umesh, D. P. Dorairaj, and S. C. N. Hsu		
27.28	Product Class 28: β-Diketimines (1,3-Diimines)		259
27.28.1	Product Subclass 1: <i>N,N'</i>-Diaryl β-Diketimines		260
27.28.1.1	Method 1:	Synthesis from Pentane-2,4-diones and Arylamines	260
27.28.1.2	Method 2:	Synthesis from 1,1,1,5,5,5-Hexafluoropentane-2,4-dione by Aza-Wittig Reaction	267
27.28.1.3	Method 3:	Synthesis from 1,3,3-Tributoxy-2-cyanoprop-1-ene by Hydrolysis and Subsequent Reaction with an Arylamine	268
27.28.1.4	Method 4:	Synthesis of Bis(<i>N,N'</i> -Diaryl β -Diketimine) Ligands from 2-Hydroxy-4-(arylimino)pent-2-enes and Arenediamines	268
27.28.1.5	Method 5:	Synthesis of <i>N,N',N''</i> -Triaryl β -Triketimines by Reaction of β -Diketimines with Butyllithium and Acetimidoyl Chlorides	269
27.28.1.6	Method 6:	Preparation of <i>N,N'</i> -Diaryl β -Diketiminato Metal Complexes	271
27.28.2	Product Subclass 2: <i>N,N'</i>-Dialkyl β-Diketimines		277
27.28.2.1	Method 1:	Synthesis from Pentane-2,4-diones and Alkylamines	277
27.28.2.2	Method 2:	Synthesis of Tris(<i>N,N'</i> -Dialkyl β -Diketimine) Ligands from 1,3,5-Tris(aminomethyl)-2,4,6-triethylbenzene and a Pentane-2,4-dione Monoketal	283
27.28.2.3	Method 3:	Thionation of Arsanil-Substituted Diketimines with Elemental Sulfur	284
27.28.2.4	Method 4:	Preparation of <i>N,N'</i> -Dialkyl β -Diketiminato Metal Complexes	284

27.28.3	Product Subclass 3: <i>N</i>-Aryl-<i>N'</i>-alkyl β-Diketimines	288
27.28.3.1	Method 1: Synthesis from 2-(Arylamino)pent-2-en-4-ones and Alkylamines	288
27.28.3.2	Method 2: Synthesis of Bis(<i>N</i> -Aryl- <i>N'</i> -alkyl β -Diketimine) Ligands from 2-(Arylamino)pent-2-en-4-ones and Alkanediamines	292
27.28.3.3	Method 3: Preparation of <i>N</i> -Aryl- <i>N'</i> -alkyl β -Diketiminato Metal Complexes	294

Volume 40: Amines, Ammonium Salts, Amine N-Oxides, Haloamines, Hydroxylamines and Sulfur Analogues, and Hydrazines

40.1 Product Class 1: Amino Compounds

40.1.8	Product Subclass 8: Piperazines New	
	Z.-S. Ye	
40.1.8	Product Subclass 8: Piperazines	303
40.1.8.1	Synthesis by Ring-Closure Reactions	304
40.1.8.1.1	By Formation of One C—C Bond	304
40.1.8.1.1.1	Fragment C—N—C—C—N—C	304
40.1.8.1.1.1.1	Method 1: Electroreductive Cyclization of Diimines	304
40.1.8.1.1.1.2	Method 2: Manganese-Mediated Reductive Cyclization of Diimines	305
40.1.8.1.1.1.2.1	Variation 1: Zinc-Mediated Reductive Cyclization of Diimines	307
40.1.8.1.1.1.3	Method 3: Dieckmann Cyclization of Carbamates	308
40.1.8.1.2	By Formation of One C—N Bond	309
40.1.8.1.2.1	Fragment C—C—N—C—C—N	309
40.1.8.1.2.1.1	Method 1: Nickel-Catalyzed Intramolecular Cyclization of <i>N</i> -(2-Hydroxyethyl)ethane-1,2-diamines	309
40.1.8.1.2.1.1.1	Variation 1: Intramolecular Fukuyama–Mitsunobu Cyclization of <i>N</i> -(2-Hydroxyethyl)ethane-1,2-diamines	309
40.1.8.1.2.1.2	Method 2: Titanium-Catalyzed Intramolecular Hydroamination of Aminoalkynes	311
40.1.8.1.2.1.2.1	Variation 1: Gold-Catalyzed Intramolecular Hydroamination of Aminoalkynes	311
40.1.8.1.2.1.3	Method 3: Zirconium-Catalyzed Intramolecular Hydroamination of Aminoalkenes	313
40.1.8.1.2.1.3.1	Variation 1: Palladium-Catalyzed Intramolecular Hydroamination of Aminoalkenes	314
40.1.8.1.2.1.3.2	Variation 2: Palladium-Catalyzed Intramolecular Oxidative Amination of Aminoalkenes	315
40.1.8.1.2.1.3.3	Variation 3: Palladium-Catalyzed Carboamination of Aminoalkenes	317

40.1.8.1.2.1.4	Method 4:	Iridium-Catalyzed Asymmetric Allylic Amination of Indole- or Pyrrole-Tethered Allylic Carbonates	318
40.1.8.1.2.1.5	Method 5:	Intramolecular Cyclization of Amino Acid Esters	320
40.1.8.1.2.1.6	Method 6:	Intramolecular Reductive Cyclization of 4-Imidoyl- β -lactams	320
40.1.8.1.2.1.6.1	Variation 1:	Intramolecular Reductive Cyclization of Ethyl (2-Azidoethyl)glycinates	321
40.1.8.1.2.1.7	Method 7:	Intramolecular Michael Cyclization of Amino Acrylates	322
40.1.8.1.2.1.8	Method 8:	Intramolecular Cyclization of Halogenated Carbamates	323
40.1.8.1.2.1.8.1	Variation 1:	Intramolecular Cyclization of Mesylated Carbamates	324
40.1.8.1.3		By Formation of One C—C Bond and One C—N Bond	325
40.1.8.1.3.1		Fragments C—N—C—C and C—N	325
40.1.8.1.3.1.1	Method 1:	Castagnoli–Cushman Cyclization of Imines and Alicyclic Anhydrides	325
40.1.8.1.3.2		Fragments C—N—C—C—N and C	326
40.1.8.1.3.2.1	Method 1:	Copper-Promoted Cyclization of SnAP Reagents and Aldehydes	326
40.1.8.1.3.2.1.1	Variation 1:	From SnAP Reagents and Ketones	327
40.1.8.1.3.2.1.2	Variation 2:	Copper-Catalyzed Cyclization of Aldehydes and SnAP Reagents	328
40.1.8.1.3.2.2	Method 2:	Photocatalytic Cyclization of Silicon Amine Reagents and Aldehydes/Ketones	329
40.1.8.1.4		By Formation of Two C—C Bonds	330
40.1.8.1.4.1		Fragments C—N—C and C—N—C	330
40.1.8.1.4.1.1	Method 1:	Tetrakis(dimethylamino)titanium(IV)-Mediated Dimerization of Azomethine Ylides	330
40.1.8.1.4.1.1.1	Variation 1:	Visible-Light Irradiation and Triorganoaluminum-Enabled Dimerization of Azomethine Ylides	331
40.1.8.1.5		By Formation of Two C—N Bonds	332
40.1.8.1.5.1		Fragments C—C—N—C—C and N	332
40.1.8.1.5.1.1	Method 1:	Cyclization of Iminodiacetic Acids or Iminodiacetic Acid Anhydrides and Amines	332
40.1.8.1.5.1.1.1	Variation 1:	From Bis(2-haloethyl)amines and Amines	334
40.1.8.1.5.1.1.2	Variation 2:	From Bis[2-(tosyloxy)ethyl]amines and Amines	335
40.1.8.1.5.1.1.3	Variation 3:	From Oxo Esters and Amines	335
40.1.8.1.5.1.1.4	Variation 4:	From Halo Esters and Amines	336
40.1.8.1.5.1.1.5	Variation 5:	From Ethyl 2-(Aziridin-1-yl)acetates and Amines	337
40.1.8.1.5.1.2	Method 2:	Ruthenium-Catalyzed N-Heterocyclization of 1,5-Diols and Amines	338
40.1.8.1.5.1.3	Method 3:	Ugi Reaction of 2-(2-Formyl-1 <i>H</i> -pyrrol-1-yl)acetic Acids, Amines, and Isocyanides	339
40.1.8.1.5.2		Fragments C—C—N and C—C—N	340
40.1.8.1.5.2.1	Method 1:	Dimerization of Aziridines	340

40.1.8.1.5.2.2	Method 2:	Cyclization of Indole/Pyrrole-2-carboxylate Esters and Vinylaziridines	341
40.1.8.1.5.2.3	Method 3:	Cyclization of Aziridines and 2-Aminoethanol	342
40.1.8.1.5.2.4	Method 4:	Cyclization of Aziridines and Propargylamines	345
40.1.8.1.5.2.5	Method 5:	Disrupted Ugi Reaction of Amino Acids, Isocyanides, and Aziridine Aldehyde Dimers	346
40.1.8.1.5.2.6	Method 6:	Dimerization of β -Bromo 4-Toluenesulfonamides	347
40.1.8.1.5.3	Fragments C—C and N—C—N		348
40.1.8.1.5.3.1	Method 1:	Cyclization of Alkenes and Ethane-1,2-diamines	348
40.1.8.1.5.3.2	Method 2:	Cyclization of Vinylsulfonium Salts and Ethane-1,2-diamines ..	349
40.1.8.1.5.3.2.1	Variation 1:	Cyclization of (2-Bromoethyl)sulfonium Salts and Ethane-1,2-diamines	350
40.1.8.1.5.3.2.2	Variation 2:	Cyclization of Vinylselenones and Ethane-1,2-diamines	351
40.1.8.1.5.3.3	Method 3:	Cyclization of Allenes/Alkynes and Ethane-1,2-diamines	352
40.1.8.1.5.3.3.1	Variation 1:	Cyclization of 1-Haloalk-1-yne and Ethane-1,2-diamines	353
40.1.8.1.5.3.4	Method 4:	Cyclization of Dicarbonyls and Ethane-1,2-diamines	354
40.1.8.1.5.3.4.1	Variation 1:	Cyclization of α -Hydroxy Ketones and Ethane-1,2-diamines ..	355
40.1.8.1.5.3.4.2	Variation 2:	Cyclization of 1,2-Diols and Ethane-1,2-diamines	355
40.1.8.1.5.3.5	Method 5:	Cyclization of Propargyl Carbonates and Ethane-1,2-diamines	356
40.1.8.1.5.3.6	Method 6:	Cyclization of 1,2-Dihalides and Ethane-1,2-diamines	358
40.1.8.1.5.3.7	Method 7:	Cyclization of α -Halogenated Acetates and Ethane-1,2-diamines	358
40.1.8.1.5.3.7.1	Variation 1:	Cyclization of α -Haloaldehydes and Ethane-1,2-diamines	359
40.1.8.1.5.3.8	Method 8:	Cyclization of Epoxysulfones and Ethane-1,2-diamines	361
40.1.8.1.5.3.8.1	Variation 1:	Cyclization of Epichlorohydrin and Ethane-1,2-diamines	361
40.1.8.1.5.3.8.2	Variation 2:	Cyclization of Nitroepoxides and Ethane-1,2-diamines	362
40.1.8.1.5.3.8.3	Variation 3:	Cyclization of Geminal Dicyanoepoxides and Ethane-1,2-diamines	363
40.1.8.1.5.3.9	Method 9:	Cyclization of (Chloroalkyl)oxadiazoles and Ethane-1,2-diamines	364
40.1.8.1.5.3.10	Method 10:	Cyclization of (Z)-But-2-ene-1,4-diyl Dimethyl Bis(carbonate) and Ethane-1,2-diamines	366
40.1.8.1.6	By Formation of One C—C Bond and Two C—N Bonds		366
40.1.8.1.6.1	Fragments C, C, and N—C—N		366
40.1.8.1.6.1.1	Method 1:	Cyclization of 1,2-Diamines, Ketones, and Chloroform	366

40.1.8.1.7	By Formation of Three C—N Bonds	367
40.1.8.1.7.1	Fragments C—C, C—C—N, and N	367
40.1.8.1.7.1.1	Method 1: Cyclization of Aziridines, Anilines, and Propargyl Carbonates ·	367
40.1.8.1.8	By Formation of Two C—C Bonds and Two C—N Bonds	368
40.1.8.1.8.1	Fragments C, C, C—N, and C—N	368
40.1.8.1.8.1.1	Method 1: Cyclization of Isatins and Amines	368
40.1.8.2	Synthesis by Ring Transformation	370
40.1.8.2.1	By Ring Enlargement	370
40.1.8.2.1.1	Method 1: From Imidazolidines	370
40.1.8.2.2	By Ring Contraction	371
40.1.8.2.2.1	Method 1: From Diazepanes	371
40.1.8.3	Synthesis by Reduction of Hydropyrazines and Pyrazines	371
40.1.8.3.1	Synthesis by Reduction of Hydropyrazines	371
40.1.8.3.1.1	Method 1: Asymmetric Hydrogenation of Dihydropyrazines	371
40.1.8.3.1.1.1	Variation 1: Asymmetric Hydrogenation of 5,6-Dihydropyrazin-2(1 <i>H</i>)- ones	373
40.1.8.3.1.1.2	Variation 2: Asymmetric Hydrogenation of 2-Aryl-5,6-dihydropyrazines ··	374
40.1.8.3.2	Synthesis by Dearomatization of a Pyrazine	375
40.1.8.3.2.1	Heterogeneous Catalysis	375
40.1.8.3.2.1.1	Method 1: Palladium-Catalyzed Hydrogenation	375
40.1.8.3.2.1.2	Method 2: Platinum-Catalyzed Hydrogenation	375
40.1.8.3.2.1.3	Method 3: Nickel-Catalyzed Hydrogenation	376
40.1.8.3.2.2	Homogeneous Catalysis	377
40.1.8.3.2.2.1	Method 1: Rhodium-Catalyzed Asymmetric Hydrogenation of Amide- Substituted Pyrazines	377
40.1.8.3.2.2.2	Method 2: Iridium-Catalyzed Asymmetric Hydrogenation of Pyrazinium Salts	377
40.1.8.3.2.2.2.1	Variation 1: Iridium-Catalyzed Asymmetric Hydrogenation of Tosylamido- Substituted Pyrazines	379
40.1.8.3.2.3	Reductions Promoted by Stoichiometric Hydride Sources	380
40.1.8.3.2.3.1	Method 1: Reduction with Sodium Borohydride	380
40.1.8.3.3	Addition Reactions	381
40.1.8.3.3.1	Method 1: Addition of Grignard Reagents to Pyrazine <i>N</i> -Oxides	381
40.1.8.4	Synthesis by Substituent Modification	382
40.1.8.4.1	Of Hydrogen	382
40.1.8.4.1.1	At a Ring Carbon Atom of a Piperazine	382
40.1.8.4.1.1.1	Method 1: Lithiation/Trapping of <i>N</i> -(<i>tert</i> -Butoxycarbonyl)piperazines ··	382

40.1.8.4.1.1.2	Method 2:	Rhodium-Catalyzed Dehydrogenative Carbonylation of <i>N</i> -(Pyridin-2-yl)piperazines	384
40.1.8.4.1.1.2.1	Variation 1:	Rhodium-Catalyzed C—H Arylation	385
40.1.8.4.1.1.2.2	Variation 2:	Tantalum-Catalyzed Hydroaminoalkylation	386
40.1.8.4.1.1.3	Method 3:	Photoredox Catalysis for C—H Arylation	386
40.1.8.4.1.1.4	Method 4:	Photoredox Catalysis for C—H Vinylation	388
40.1.8.4.1.1.5	Method 5:	Free-Radical C—H Alkylation	389
40.1.8.4.1.1.6	Method 6:	Visible-Light Photocatalyzed Dehydrogenation/[2 + 2] Cycloaddition Reaction of Piperazines and Alkynes	389
40.1.8.4.1.1.7	Method 7:	Copper-Catalyzed C—H Oxidation	390
40.1.8.4.1.1.8	Method 8:	α -C—H Methoxylation by Anodic Oxidation	391
40.1.8.4.1.2		At a Ring Nitrogen Atom of a Piperazine	391
40.1.8.4.1.2.1	Method 1:	Asymmetric Acylation	391
40.1.8.4.1.2.2	Method 2:	Arylation of Piperazines with Aryl Halides	393
40.1.8.4.1.2.2.1	Variation 1:	Arylation of Piperazines with Diaryliodonium Salts	399
40.1.8.4.1.2.2.2	Variation 2:	Arylation of Piperazines with Arylboronic Acids	400
40.1.8.4.1.2.2.3	Variation 3:	Arylation of Piperazines with Aromatic Ethers	401
40.1.8.4.1.2.2.4	Variation 4:	Arylation of Piperazines with Aryl Sulfides	402
40.1.8.4.1.2.2.5	Variation 5:	Arylation of Piperazines with Phenol Derivatives	403
40.1.8.4.2		Of Carbon Functionality	405
40.1.8.4.2.1	Method 1:	Catalytic Asymmetric Allylic Alkylation of Piperazin-2-ones ..	405
40.1.8.4.3		Cycloadditions	406
40.1.8.4.3.1	Method 1:	Inter- and Intramolecular Diels–Alder Cycloadditions of 3-Ylidene-piperazine-2,5-diones and Alkenes	406
40.1.8.4.4		Ring Opening of 1,4-Diazabicyclo[2.2.2]octane	407
40.1.8.4.4.1	Method 1:	Reaction of Electron-Deficient Aryl Halides or Heteroaromatic Halides, Nucleophiles, and 1,4-Diazabicyclo[2.2.2]octane ..	407
40.1.8.4.4.2	Method 2:	Reaction of Arynes, Nucleophiles, and 1,4-Diazabicyclo[2.2.2]octane	408
40.1.8.4.4.3	Method 3:	Reaction of Heterocyclic <i>N</i> -Oxides, Nucleophiles, and 1,4-Diazabicyclo[2.2.2]octane	410
40.1.8.4.4.4	Method 4:	Reaction of Electron-Deficient Acetylenes, Arenecarboxylic Acids, and 1,4-Diazabicyclo[2.2.2]octane	411
40.1.8.4.4.5	Method 5:	Reaction of Diaryliodonium Salts, Nucleophiles, and 1,4-Diazabicyclo[2.2.2]octane	412
40.1.8.4.4.6	Method 6:	Copper-Catalyzed Reaction of Alkyl Halides, Aryl Halides, and 1,4-Diazabicyclo[2.2.2]octane	413
