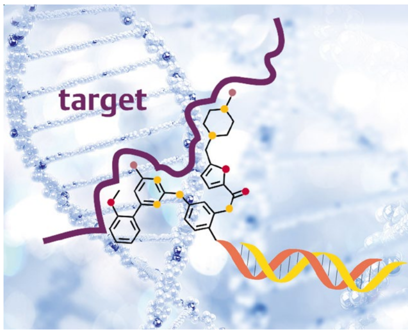
Release: SOS 4.32, March 2024

DNA-Encoded Libraries

This release includes 8 new articles, thus completing the volume **DNA-Encoded Libraries**.



Edited by Dr. Jörg Scheuermann (ETH-Zurich, Switzerland) and Prof. Yizhou Li (Chongqing University, P. R. China)

- **Amide-Bond-Forming Reactions**
  Y. Li, X. Fang, and Y. Wang
- **Metal-Free DEL-Compatible C-C Bond Forming Reactions**
  Z. Wang and A. L. Satz
- **On-DNA C-H Transformations**
  X. Wang and X. Lu
- **Metal-Promoted DEL-Compatible C-C Bond Forming Reactions**
  F. Migliorini, S. Puglioli, D. Neri, S. Cazzamalli, and N. Favalli
- **On-DNA Functional-Group Transformations**
  N. Simmons, P. Chheda, and D. Schuman
- **On-DNA Cyclization Reactions**
  G. Liu and J. Feng
- **On-DNA C-X (X = N, O, P, S, Se) Bond Forming Reactions**
  W. Hou, G. Yang, and H. Xu
- **On-DNA Photoredox-Catalyzed Reactions**
  A. Granados and G. A. Molander
- **DNA-Encoded Isocyanide Multicomponent Reactions**
  S. Willems and A. Brunschweiger
- **Reversible Immobilization of DNA for Chemical Modification**
  R. M. Franzini

- **Covalent Attachment on a Solid Support**
  R. M. Franzini
- **DNA-Templated Synthesis**
  G. Zhang, Q. Nie, and J. Sun
- **Encoding Using Single-Stranded DNA (Iterative Splint-Ligation Procedures)**
  T. Georgiev, S. Cazzamalli, D. Neri, and G. Bassi
- **Encoded Self-Assembling (Dynamic) Chemical Libraries**
  L. Prati, L. Lucaroni, S. Cazzamalli, D. Neri, and S. Oehler
- **Macrocyclic DELs**
  D. Gillingham and B. Sauter
- **DNA-Encoded Dynamic Combinatorial Chemical Libraries**
  F. V. Reddavide, S. Heiden, M. Cui, W. Lin, M. Thompson, and Y. Zhang
- **DEL Selection Using DNA-Programmed Affinity Labelling (DPAL)**
  Y. Huang and X. Li
- **Selections of DNA-Encoded Libraries to Protein Targets within Living Cells**
  B. Cai and C. J. Krusemark
- **Informatic Tools, Processing, and Evaluation of DEL Selection Dat On-DNA Resynthesis and Affinity Selection Mass Spectrometry (ASMS)**
  W. Su, B. Xia, and T. L. Foley
- **Micelle-Mediated Synthesis**
  J. S. Graham, H. A. Stanway-Gordon, and M. J. Waring
- **Encoding Using Double-Stranded DNA: A Headpiece-Based DNA Ligation Strategy**
  Y. Zhou , Y. Huang , L. Xu , and F. Xiong
- **Chemical Ligation/Encoding**
  A. D. Keefe and A. Litovchick
- **Peptide Nucleic Acid (PNA) Encoded Libraries**
  L. Farrera-Soler, B. R. Vummidi, S. Barluenga, and N. Winssinger
- **Natural-Product-Enriched DELs**
  H. Xu, P. Ma, and G. Yang
- **Selections by Affinity Capture on Solid Support**
  A. Gloger and J. Scheuermann
- **Selections of DNA-Encoded Libraries to Protein Targets on Living Cells**
  B. Cai and C. J. Krusemark
- **Informatic Tools, Processing, and Evaluation of DEL Selection Data**
  W. Cui

Science of Synthesis Knowledge Updates

SOS is continuously updated with high-quality content using clearly defined criteria for method selection as well as established editorial processes. The Editorial Board, in conjunction with the volume editors and expert authors, reviews the whole field of synthetic organic chemistry as presented in SOS and evaluates significant developments in synthetic methodology.

This release includes ten new articles from the **Knowledge Updates**.

- **Thiophenes and Thiophene 1,1-Dioxides**
  P. A. Harris
  (Ed. A. Fürstner)
- **Tellurophenes**
  P. A. Harris
  (Ed. A. Fürstner)
- **C(sp^3)-H Functionalization of the Side Chain of α-Amino Esters**
  S. Chowdhury
  (Ed. J.-M. Campagne)
- **Synthesis of Carboxylic Acids with Retention of the Functional Group**
  M. Sawamura and Y. Shimizu
  (Ed. J.-M. Campagne)
- **Thiocarboxylic *S*-Acid, Selenocarboxylic *Se*-Acid, and Tellurocarboxylic *Te*-Acid Derivatives**
  T. Cellnik, W. Jo, and A. Healy
  (Ed. J.-M. Campagne)
- **Selenophenes**
  P. A. Harris
  (Ed. A. Fürstner)
- **Catalytic α-Arylation of Alkyl Alkanoates**
  L. Liao, Y. Zhang, and J.-S. Yu
  (Ed. J.-M. Campagne)
- **Arenecarboxylic Acid Esters**
  J. Ying and X.-F. Wu
  (Ed. J.-M. Campagne)
- **Alkanedioic Acids and Derivatives**
  Z. Yang and K. Dong
  (Ed. J.-M. Campagne)
- **Amidines (Imidamides) N-Substituted by Metals, Halogens, Oxygen, and Other Heteroatoms**
  H. Huang, G.-J. Deng, and X. Ji
  (Eds. X. Jiang and M. Wang)

SOS Content Alerts

To be informed every time new content is released, sign up for the *Science of Synthesis* Alerts **here**! You will then receive an email whenever new content is added to SOS
